Dear Secretary of State,

East Anglia One North Offshore Wind Farm Project - EN10077

East Anglia Two Offshore Wind Farm Project - EN10078

National Grid proposals for Nautilus, a multi-purpose interconnector

Eurolink multi-purpose interconnector

Further to our most recent letter to you of 21st October, 2021, thank you for seeking further information on the above planning applications.

If the cumulative effects of these hugely destructive proposals will demonstrably damage or permanently destroy the on-shore habitats of *Mustelidae – meles meles*, *Triturus cristatus* and countless numbers of other *Aves* and *Animalia* whose lives depend on a peaceful and unspoilt environment, how much effect can you imagine there will be on *Homo sapiens* in and around Friston, and whose peaceful enjoyment of their habitats will be destroyed for the rest of their lives.

With best and most hopeful wishes,

Paul and Caroline.
