Subject: Five confirmed energy projects

Dear Sir,

This Consequence of these Energy projects in East Anglia is enormous .

The cumulative impact has not been assessed from the evidence given .

Multiple Landfalls on a fragile coastline.

Multiple cable routes

National Grid Ventures

Sea Link interconnector

Questionable presentation made to the inspectorate by the Scottish power and others .

This will be a disgrace for a Conservative led Government to allow this to continue .

Open your eyes to public opinion as lives will be devastated , on your watch . This will not be forgotten by generations as there will be no recovery once lost .

It must STOP NOW.

Graham Bagnall

Aldeburgh Resident
