Subject: Suffolk

In recognition of your learned colleague and our esteemed Rt Hon Therese Coffey MP. Please can you

support her proposal of a split decision which grants consent for the offshore infrastructure but the onshore is rejected in favour of full consideration of better locations for this infrastructure where the adverse impacts are minimised at a brownfield or industrialised site.

This gives time to enable Ofgem/BEIS to follow through on a spatial strategy for wind energy infrastructure and the aims of the Offshore Transmission Network Review and pivot to better solutions for onshore wind energy infrastructure using a reduced number of cable routes at a brownfield site.

If this is not done we are looking at our whole coastline being ruined – our livelihood as a tourist destination trashed.

You are a man who doesn't reach your decisions lightly and you would be most welcome to come and stay in my flat and look at the area you are looking to decimate before you reach such a decision.

With kind regards, Amanda Churchill

This in itself should stop this happening.

The destruction of biodiversity as **multiple cable routes**, running for approximately 9 km, cut through the protected Suffolk Coast and Heaths AONB (Area of Outstanding Natural Beauty), the Leiston-Aldeburgh SSSI (Site of Special Scientific Interest), the River Hundred, and the Sandlings SPA (Special Protected Area). How could you in your very special position voted for by your constituents dream of doing such harm to such a special area when there are perfectly adequate brownfield sites which are much easier to access.
