Dear Sir

Re: EA1N & EA2

I kindly ask you to hold the Open Floor Hearings for the above-mentioned projects in person. As the Inspectorate has chosen to hold the review of the two DCO application virtually. I did listen in on the Preliminary Meeting and it is apparent to me that professionals come across much more convincingly in this format than ordinary citizens.

As SPR has reserved the concert hall at Snape Maltings I think at this point it would be important to set it up as a hybrid mix of in person and virtual meeting. In this way as many people as possible can take part. The implications to our community are enormous as what is proposed is one of the largest substation complexes from offshore windfarms in the world on adjacent to a small village. Everyone should have the opportunity including members of the public that are not 'tech savvy' or have access to computers to inform you of their concerns as you need to understand from us what the full ramifications of this proposal.

Thank you and I look forward to your response.

Yours faithfully

Luigi Beltrandi
