To Whom it May Concern,

Please see our attached written representation regarding SPR Friston substation.

Kind Regards,

Jill and Peter Donker Curtius

Jill and Peter Donker Curtius IP 20023333

Firstly I must say that we are in favour of green energy. However, to construct one of the largest substations ever to be built in Europe in the middle of a small, peaceful rural community just beggars belief.

A large area of local coastline is already blighted by two power stations with a third one in the planning so we cannot understand why this substation has to come seven miles inland crossing roads, private properties and forever changing the peace and tranquility of our local village.

Our daughter rides her horses on a daily bases along the roads and bridal paths right on the boundary of the proposed development area and we fear for her and her horses welfare because of increased commercial traffic. This is yet another aspect that SPR have failed to take into consideration.

The light pollution too is a very troubling prospect. The dark skies that are so special will be forever lost. Wildlife, too many to mention will be negatively affected.

It is just incomprehensible that this area was considered in the first place.

This sets a precedent for further substations and how many more are we going to allow before we realise that what we have destroyed is not retrievable.

We fully support the representation made by SASSES and Friston Parish Council.

Jill and Peter Donker Curtius
