East Anglia ONE North – EN010077

We are in favour of green energy but not for building one of Europe's largest substations in the middle of a small, peaceful, rural community. We need to find a better way to connect power to the National Grid.

Along with many thousands of tourists we are regular visitors to the Friston area valuing the easy access from London to one of Suffolk's finest beauty spots. We love Friston's open countryside and breathtaking skies and this needs to be preserved for future generations. All of this will be disrupted or destroyed by years of construction.
