

2 November, 2020.

Dear Sir or Madam,

**Reference – Proposed EA1N and EA2 developments in Suffolk Coastal – IP20023551**

I am registered as an Interested Party for the proposed Offshore and On Shore Wind Farm Developments. A project of this size will have a massive impact on the local area, I am listing my concerns below and look forward to your response:

- Permanent loss of land, trees and hedgerows, which in turn has a massive environmental impact for local wildlife.
- Impact on local residents where they are potentially losing their homes to facilitate this project. The stress of which has already made itself felt.
- Impact on local roads. With 1,700 vehicles accessing the sites every day, this will clearly impact the local road infrastructure and cause significant pollution.
- Tourism will be impacted in the short term and medium term. Many residents rely on tourism to survive.
- Any long-term environmental impacts resulting from the ongoing operations, if this project goes ahead, that would impact the local community.
- What is proposed to alleviate the environmental impact of the project post-completion?

This area of natural beauty will be irrevocably destroyed forever.

Yours faithfully,

Mrs V Chapman
