EAST ANGLIA TWO (EA2) – PINS Ref: N0200078 Unique Ref. No. EA2: 20023939

Why?

Why is this planning put forward so that it blatantly harms fellow humans and nature? There ARE alternatives that do not cause such suffering as this. I'm sure none of the planners live or know the beauty of the Suffolk area – if you did this would not be happening.

Why, why is Bradwell, an unused brownfield site not even being considered?

Why is an area so close to the natural beauty of the Suffolk coast being decimated?

Why is the countryside being carved up?

Why is Friston, a village close to surrounding AONB, Aldeburgh, Southwold, Snape, Woodbridge being targeted. Friston is an important part of the economy of these surrounding villages and this planning would ensure that this would go – destroying the link for fellow humans to come and enjoy the peace, tranquillity and countryside.

Why is AONB not protected – we need to protect the countryside, wide animals, flora and fauna for future generations to enjoy. Land that has been here forever – not planted in the twentieth century to mature for the future.

Why are you submitting fellow humans to such a stressful future?

Why are people not being considered – people who are really suffering because of this planning right on their doorstep?

Why are you submitting people to an influx of 1000's of workers and accommodation – not all employment for locals? This would change the character of the area irreversibly.

Why are you submitting people to a 10 year building plan – can you imagine the harm and disruption that would do to everyone.

Why are SP trying to bring in huge vehicles along country roads that can barely take two cars – madness!

Why doesn't SP invest properly in the future – not just a cheap option that carves its way through this green and pleasant land?

Why are people not allowed to enjoy peace, good health and care as a basic need and right in all of us? This would not provide any of that.

Why not locate away from any village – it's not just us that doesn't want this monster, others wouldn't either – but we are all keen to have greener fuels, in a green way, which this is not.

Why are we writing this?

Why, because we are passionate about this wonderful countryside and if we do not speak out it will be lost forever.

Why, because this is sheer madness – We cannot say more than that.
