Dear Examining Authority,

RE: EA1N and EA2 - SEAS OPEN FLOOR HEARING EVIDENCE

Since we are no longer allowed to hold the OFH's in a public arena, SEAS are presenting the Videos that would have been shown on TV Screens and Banners the supporters would have held up outside the chosen public venue during all Hearings. The purpose of these items was to show the Planning Inspectors' the enormous level of discontent the Community feels about the ill-conceived plans of ScottishPower Renewables and National Grid that will destroy our livelihoods and countryside.

Please find enclosed a USB stick with the following contents:

- VIDEO - Community Thoughts on EA1N and EA2
This is a video of over 24 people commenting on ScottishPower Renewables and National Grid's plans to bring offshore wind power in to their area of Suffolk Coastal.
- PHOTOS - Banners and Billboards
The photos of the Banners and Billboards were sponsored and erected by the local community to raise awareness and again to show the Planning Inspectors the depth of opposition to SPR/NGs ill-conceived plans. It was the intention many supporters to take the Banners to the Public Hearings and demonstrate their objections.

I trust that you will view these articles of evidence and submit them into the Examination Library for others to view.

With kind regards

Glynis Robertson

SEAS Team Member
