This request is in respect of East Anglia One North and East Anglia Two. I am writing from Ness House Cottage on the cliff next to the sea where the three households, Wardens Charitable Trust for Disabled Children and two occupied grazing paddocks will be entirely enclosed by the Landfall site and adjacent Cable Corridor works in the directly adjacent fields.

I strongly feel that under the very specific circumstances I describe, in terms of the danger posed to this small and isolated community, a visit here is absolutely necessary to experience at first hand the potential impact on the most isolated and private part of the AONB, its magnificently varied habitat and ambience, and on the interconnected pathways that are vital to free movement in this area to non-drivers.

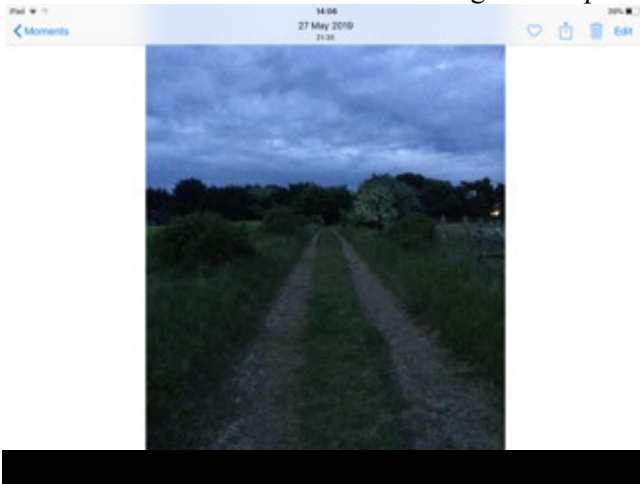

I am aware that part of the Sandlings route near here has been visited, but please do come and review the terrain and ambience on the route shown on the attached map, starting from and returning to Ness House. Permission available. If this map isn't clear, I'm happy to provide a more detailed explanation. Approx 40 minutes.

I also attach 2 further photos and very brief video for visual context.

Ness House from Landfall Site showing natural pond.

Ness House Cottage from Plot 12.

Please do let me know if there is any difficulty with this email.

Kind Regards,

Tessa.
