Thank you.
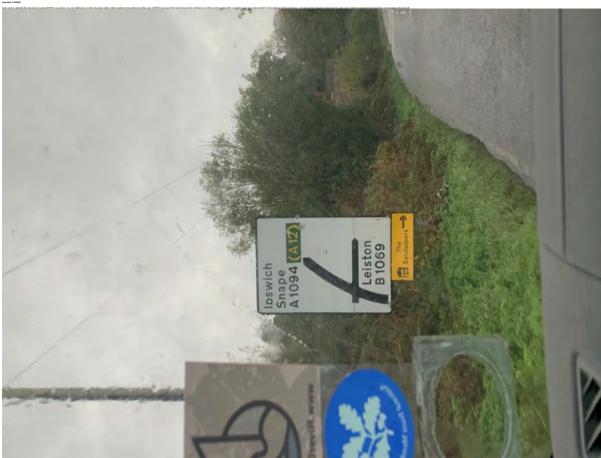

This video should have been included in the attachment.

An ambulance is trying to over take a tractor. This is the only route into Aldeburgh which has an elderly population and if the ambulance have to negotiate hundreds of HGV lorries as well as tractors, cars, cyclists etc and then the holiday traffic, then the ambulance have no hope in getting to their destination in good time.

I also would like to ask the planning inspectorate to do a site Visit in these three areas:-

Junction to B1069

I also want to add that this junction to Leiston B1069 is on a bend - it is very difficult to see the oncoming traffic when wanting to turn right out of this road. If HGV's are using this road to head to the substation, it will be nigh on impossible to actually edge out as the enormity of the vehicles will be in the way. I would ask the planning inspectorate to make a site visit here and stand and watch the cars negotiate this turn off.

Junction B1122

This junction is immediately before.
The junction B1069 - is dangerous bend.

3). I would also ask that the planning inspectorate stand outside the Tesco/Coop/etc closure by the tesco roundabout (and a little further ahead is the entrance to the community centre and children's playground). The residents park there use the main road and no vehicles have to go on the other side of the road to over take. Undoubtedly none of the HPR vehicles will use this stretch as a rat run to dig the cable trenches. Traffic will build up and cars will be unable to pass.

Best wishes

Dear Ms Cook,

Thank you for your emails. Can I just check we have received your full submission. I have 3 emails from you:

Email on 13 October (no attachments)
Email on 17 October (1 word document attached)
Email on 17 October (6 videos attached)

Please could you confirm if any further submissions are being made?

Kind regards

Caroline
