Dear Examiners,

I write to object in the strongest possible terms to the above power projects.

I object on the basis of the general loss of peace and tranquility of the area, the damage done to very sensitive wildlife habitats, to the noise pollution and disruption the works traffic will have on the limited roads into and out of the area with the inevitable risk to the health and safety of local people. The threat to local businesses including the internationally renowned Snape Maltings concert complex is huge and totally unacceptable.

I support offshore wind farm projects but there are clearly less damaging ways that the power generated by them can be harnessed offshore or brought ashore at a more suitable location.

With regards,

Annabel Chamberlain
