Dear Examining Authority

My ref. 20023368 and 20023369

I am responding to [Action Point 2, The Planning Balance from Open Floor Hearing 6](#)

I am supportive of renewable energy and the recommendation that Offshore Turbines are given consent.

I object to the proposal that Friston is the centre for the onshore infrastructure owing to the Cumulative Adverse Impacts of the effect on residents, the risk to livelihoods and to the environment. As an 'umbrella' for several proposed projects I consider the choice of Friston as a site for this and future infrastructure to be an aberration as I believe there are other far more suitable brownfield sites which can be used without the detriment that will occur in such a quiet landscape as this.

To reiterate, I call upon the Examining Authorities to recommend to the Secretary of State to **make a 'split decision'**.

With kind regards,

Annabel Chamberlain
