North Falls Offshore Wind Status Update

Dear Examiners,

I write to you as the Project Manager from North Falls Offshore Wind Farm Ltd (NFOW) who have seabed rights to develop an offshore windfarm in the southern North Sea (<https://www.northfallsoffshore.com/>). It may be of interest for you to know that at present NFOW does not have a confirmed grid connection location onshore, we currently appear in the National Grid ESO TEC register with an offshore connection location and a connection date in 2030. We (NFOW) can confirm that we do not currently have any plans to progress any work around Friston, Suffolk. You should also be aware that the NFOW project is currently not at a very advanced stage in the planning process (i.e. request for scoping opinion has not yet been issued) and as such there is very limited information regarding our project in the public domain which others could utilise to inform their own assessments.

Yours sincerely,

Martin Whyte
Project Manager
North Falls Offshore Wind Farm
