FAO Rynd Smith

My Name is Martin Cotter.

I thank the inspectorate for their due diligence throughout this examination.

I endorse the work done by SASES, SEAS, SOS, our local MP and the myriad of individuals who have fought so hard against a mighty conglomerate who have no regard for the environment or biodiversity.

I live a fraction north from the SPR Infrastructure proposed for Friston in [REDACTED]. This is a 500 year old Listed Building sitting on the Pilgrims path between Friston, Buxlow & Saxmundham. SPR tell me I should be grateful to have a new Pylon and 3 huge Cable penetrations at the bottom of my garden. It's in the best interests of the country they said!! How can a [REDACTED] dictate to me about what I should embrace and what's good for me? I am now getting quite old, if this project gets the green light It will be the final nail in my coffin 15 years of misery and no possible way out. This would be a travesty of justice to the county and people of east Suffolk. We all know we need green energy but as lots have pointed out not at any cost! There is no point in reiterating SPR's total incompetence from inception of this project to now. We know if it wasn't for cost decisions the connections would be going in the Branford trench. I pray for the correct decision don't leave my grandchildren a legacy of industrial sprawl when we all know it is totally avoidable

Kind Regards  
Martin Cotter

Mr M Cotter

IP REF 20023069 & 20023070

Dear Planning Inspectorate.

When I came home on Thursday 07/04/21 the end of my track to my property and all along grove road had numerous road signs erected and my track marked as a “works entrance” then on the Friday the signs mysteriously disappeared from my drive entrance and from Friston village. What are SPR playing at? No one seems to have been told anything about this fiasco, this sort of inconsiderate behaviour is making people ill. They seem to have no regard for any one, most of the residents including myself are old people many with delicate health. These people are making our lives a misery they are incompetent and totally arrogant. Surely there should be due process they should follow? What happened why were the signs there then gone? Why were SPR allowed to put us all through this mental torture. How can they be allowed to be instrumental in our country’s secure energy supply with this shambolic attitude, this company need holding to account and they need some teachings in compassion.

Kind regards Martin Cotter.
