For the attention of the Examining Authority

I am writing to object to the decision to extend the examinations into the EA1N and EA2 projects by 3 months.

The major problem with this extension is that it is weighted strongly in the favour of the applicant who now has a long time to fill some of the gaps in the applicant's case while, many of those who are opposed are tied up with the major issues concerning Sizewell C.

There was absolutely no warning concerning this decision.

Presumably some pressure has been put on the Government behind the scenes. In that case this pressure was secret, whereas the procedures are currently meant to be in the open as managed by the Planning Inspectorate.

The decision to extend the examination should be cancelled.

Yours sincerely  
Christopher Lewis
