Dear sirs

> More evidence of a total lack of concern that Scottish Power Renewables have for the local residents! I sent the email below directly to SPR. Can you please include this for deadline10.

> I understand that a email was sent out to “a few” Friston residents about the proposed work commencing the very next day on the fields at Friston.

> To send out such an email the evening before the commencement of works is I feel quite ridiculous and goes to show what little regard SPR have for the local community...so much for SPR’s “commitment to community engagement” !

>

> We received a letter dated 15/4/21 informing us of the Onshore/Offshore investigations- sadly again a case of information being sent out too late... as before receiving this letter we had several “slow..works access ahead “ signs appear in our road [REDACTED] on the 9/4/21..... a full 6 days before your letter arrived !

> one of the signs was actually put on my grass by the side of the road !... then suddenly the next day some of the road signs at our end of [REDACTED] (including the one on my grass) were taken away.....

> So today we have had several low loader vehicles go past our property on the way to the Friston site entrance... [REDACTED] is a fairly narrow lane and it is quite disturbing to see the works vehicles using it.

> This really doesn’t bode well should SPR ever end up getting permission to build these substations does it... at one of the many public consultations we attended we were constantly told that “ no works vehicles would use our end of [REDACTED] to reach the site”... well obviously this is something that I will most certainly be monitoring very closely.....

>

> SPR should not be carrying out any of this investigation work whilst the Planning Inspectorate are still conducting their examination of the Application.

>

> From

> Mrs C Munden
