East Anglia ONE North and East Anglia TWO Offshore Windfarms

Draft Statement of Common Ground Marine Management Organisation

Applicants: East Anglia ONE North Limited and East Anglia TWO Limited
Document Reference: ExA.SoCG-6.D12.V6
SPR Reference: EA1N_EA2-DWF-ENV-REP-IBR-000880

Date: 28th June 2021
Revision: Version 06
Author: Royal HaskoningDHV

Applicable to **East Anglia ONE North** and **East Anglia TWO**

Glossary of Acronyms

APP	Application Document
Cefas	Centre for Environment, Farming and Aquaculture Science
DCO	Development Consent Order
DML	Deemed Marine Licence
EIA	Environmental Impact Assessment
ES	Environmental Statement
ETG	Expert Topic Group
ExA	Examining Authority
MHWS	Mean High Water Springs
MMMP	Marine Mammals Mitigation Protocol
MMO	Marine Management Organisation
OOMP	Offshore Operations and Maintenance Plan
PD	Procedural Decision
PINS	Planning Inspectorate
SAC	Special Area of Conservation
SEL	Sound Exposure Levels
SELss	Single Strike Sound Exposure Levels
SIP	Site Integrity Plan
SNS	Southern North Sea
SoCG	Statement of Common Ground
SPLpeak	Peak Sound Pressure Level

Glossary of Terminology

Applicants	East Anglia TWO Limited / East Anglia ONE North Limited
Construction, operation and maintenance platform	A fixed offshore structure required for construction, operation, and maintenance personnel and activities.
East Anglia TWO project	The proposed project consisting of up to 75 wind turbines, up to four offshore electrical platforms, up to one construction operation and maintenance platform, inter-array cables, platform link cables, up to one operational meteorological mast, up to two offshore export cables, fibre optic cables, landfall infrastructure, onshore cables and ducts, onshore substation, and National Grid infrastructure.
East Anglia ONE North project	The proposed project consisting of up to 67 wind turbines, up to four offshore electrical platforms, up to one construction operation and maintenance platform, inter-array cables, platform link cables, up to one operational meteorological mast, up to two offshore export cables, fibre optic cables, landfall infrastructure, onshore cables and ducts, onshore substation, and National Grid infrastructure.
East Anglia TWO / East Anglia ONE North windfarm site	The offshore area within which wind turbines and offshore platforms will be located.
Evidence Plan Process	A voluntary consultation process with specialist stakeholders to agree the approach to the EIA and the information required to support HRA.
Generation Deemed Marine Licence (DML)	The deemed marine licence in respect of the generation assets set out within Schedule 13 of the draft DCO.
Horizontal directional drilling (HDD)	A method of cable installation where the cable is drilled beneath a feature without the need for trenching.
Inter-array cables	Offshore cables which link the wind turbines to each other and the offshore electrical platforms, these cables will include fibre optic cables.
Landfall	The area (from Mean Low Water Springs) where the offshore export cables would make contact with land and connect to the onshore cables.
Offshore cable corridor	This is the area which will contain the offshore export cables between offshore electrical platforms and landfall.
Offshore development area	The East Anglia TWO / East Anglia ONE North windfarm site and offshore cable corridor (up to Mean High Water Springs).
Offshore electrical platform	A fixed structure located within the windfarm area, containing electrical equipment to aggregate the power from the wind turbine generators and convert it into a more suitable form for export to shore.
Offshore export cables	The cables which would bring electricity from the offshore electrical platforms to the landfall. These cables will include fibre optic cables.
Offshore platform	A collective term for the construction, operation and maintenance platform and the offshore electrical platforms.
Platform link cable	Electrical cable which links one or more offshore platforms, these cables will include fibre optic cables.
Safety zone	A marine area declared for the purposes of safety around a renewable energy installation or works / construction area under the Energy Act 2004.
Scour protection	Protective materials to avoid sediment being eroded away from the base of the foundations as a result of the flow of water.

Transmission Deemed Marine License (DML)	The deemed marine licence in respect of the transmission assets set out within Schedule 14 of the draft DCO.
--	--

1 Introduction

1.1 Background

1. This document is applicable to both the East Anglia ONE North and East Anglia TWO applications, and therefore is endorsed with the yellow and blue icon used to identify materially identical documentation in accordance with the Examining Authority's (ExA) procedural decisions on document management of 23rd December 2019. Whilst for completeness of the record this document has been submitted to both Examinations, if it is read for one project submission there is no need to read it again for the other project.
2. This Statement of Common Ground (SoCG) has been prepared between East Anglia TWO Limited, East Anglia ONE North Limited (hereafter the Applicants) and the Marine Management Organisation (MMO) in relation to the East Anglia TWO project and the East Anglia ONE North project (the Projects). It identifies areas of the Projects' Development Consent Order (DCO) applications (the Applications) where matters are agreed or not agreed between the parties.
3. The Applicants have had regard to the guidance for the examination of applications for development consent (Department for Communities and Local Government, 2015) when compiling this SoCG.
4. This SoCG has been structured to reflect topics of interest to the MMO on the Applications. Topic specific matters agreed, not agreed and actions to resolve between the Applicants and the MMO are included within this SoCG.
5. The tables presented below are the basis for a SoCG with the Applicants and the MMO in respect of the following topic(s):
 - Marine Geology, Oceanography and Physical Processes;
 - Marine Water and Sediment Quality;
 - Benthic Ecology;
 - Fish and Shellfish Ecology;
 - Commercial Fisheries;
 - Marine Mammals; and
 - Draft, Outline and In-Principle Plan Documents.
6. Throughout the SoCG the phrase "Agreed" identifies any point of agreement between the Applicants and the MMO.
7. The phrase "Not Agreed" identifies any point that is not agreed between the Applicants and the MMO.

8. The tables in **section 2** are based upon discussions and information exchanged between the Applicants and the MMO during the pre-application and examination phases of the application.

1.2 The Development

9. The key offshore components of each project will comprise:
- Offshore wind turbines and their associated foundations;
 - Offshore platforms - up to four offshore electrical platforms and their associated foundations supporting some of the windfarm's electrical equipment, and up to one construction, operation and maintenance platform and associated foundations that may cater for personnel and activities required during the construction phase and operation and maintenance of the windfarm;
 - Sub-sea cables between the wind turbines and between wind turbines and offshore electrical platforms (inter-array), between separate offshore platforms (platform link cables) and between offshore electrical platforms and the landfall (export cables);
 - Scour protection around foundations and on inter-array, platform link and export sub-sea cables as required; and
 - Potential for one meteorological mast (met mast) and its associated foundations for monitoring wind speeds during the operational phase of the windfarm.
10. The key onshore components of each project will comprise:
- The landfall site with up to two transition bays to connect the onshore and offshore cables;
 - Up to six onshore cables, up to two fibre optic cables and up to two distributed temperature sensing cables installed underground (some or all of which may be installed in ducts) and associated jointing bays installed underground;
 - Onshore substation; and
 - Electrical cable connection between onshore substation and National Grid substation.
11. National Grid infrastructure will also be required to connect each project to the national electricity grid. Key components of the National Grid infrastructure which is common to both projects will comprise:
- National Grid substation;
 - Cable sealing end compounds and a cable sealing end (with circuit breaker) compound; and

- Realignment of the existing overhead lines; including the reconstruction or replacement of up to three existing overhead pylons in proximity to the National Grid substation and the addition of up to one new pylon in close proximity to existing overhead pylons.

1.3 Summary of Agreed, Not Agreed and Outstanding Matters

12. **Table 1.1** provides a summary of the matters agreed and not agreed between the Applicants and the MMO for each of the relevant receptor topics. For further information see the detailed agreement **Table 2.2**.

Table 1.1 Summary of Areas of Agreed, Not Agreed or those which are Outstanding for Receptor Topic Areas Raised by MMO

Topic	Agreed, Not Agreed or Outstanding
Marine Geology, Oceanography and Physical Processes	All matters Agreed .
Marine Water and Sediment Quality	All matters Agreed .
Benthic Ecology	All matters are Agreed with the exception of the inclusion of Condition 24 of the Generation DML and Condition 20 of the Transmission DML regarding Scour Protection and Cable Protection during operation which is Not Agreed because the MMO consider that a new marine licence is required for any new cable or scour protection that is installed in locations where it was not previously installed. However, the MMO has agreed on a 'without prejudice' basis to the wording of the conditions and their inclusion in the DMLs (see MMO-205).
Fish and Shellfish Ecology	All matters are Agreed .
Commercial Fisheries	All matters are Agreed .
Marine Mammals	All matters Agreed .
Development Consent Order (non-EIA specific)	All matters are Agreed . The inclusion of UXO clearance within the DMLs is Not Agreed where the MMO position is that this activity should be conditioned through a separate Marine Licence however the MMO is Agreed , without prejudice to the wording of the Conditions. The absence of consultation timescales within the Offshore Ornithology Compensation schedule is Not Agreed .
Draft, In-Principle and Outline Plan Documents	<ul style="list-style-type: none"> • Draft MMMP – Agreed • In-Principle SNS SAC SIP – Agreed • Site Characterisation Report (Windfarm Site) – Outstanding • Site Characterisation Report (Offshore Cable Corridor) – Outstanding

Topic	Agreed, Not Agreed or Outstanding
	<ul style="list-style-type: none"><li data-bbox="518 331 1409 488">• Outline Offshore Operations and Maintenance Plan (OOMP) – Not Agreed because the MMO do not consider that cable and scour protection installation during operation should be included in the DMLs although the MMO have agreed to this being included on a ‘without prejudice’ basis (see row MMO-205)<li data-bbox="518 504 1018 533">• In Principle Monitoring Plan – Agreed<li data-bbox="518 548 1193 577">• Outline <i>Sabellaria</i> Reef Management Plan – Agreed

2 Statement of Common Ground

13. A summary of the consultation undertaken to date with the MMO and the matters agreed or not agreed between the Applicants and the MMO (based on discussions and information exchanged between the Applicants and the MMO during the pre-application, post-application and examination phases of the applications) are set out below for each of the SoCG topic areas.
14. The areas of agreement and disagreement between the Applicants and the MMO are set out below.
15. Additionally, the Applicants and the MMO note the general engagement that has been undertaken since submission of the Applications and how that correlates with this SoCG and the examination process for the Applications.
16. The MMO submitted its relevant representation on 27th January 2020 (RR-052). The Applicants submitted the Applicants' Comments on the Relevant Representations (AS-036) in response to Procedural Decision 11 (11th June 2020).
17. Two multi-party workshops were held with the MMO and other stakeholders in late July and early August 2020 to discuss offshore ornithology, and marine mammals and other offshore matters.
18. Through the SoCG engagement process, the MMO provided comments in response to the Applicants' Comments on the Relevant Representations (AS-036) on 8th September 2020. Following this, the Applicants provided a further response to the MMO on the 12th October 2020.
19. This engagement since submission of the Applicants' Comments on the Relevant Representations (AS-036) has allowed both parties to agree a large number of the matters raised in the MMO relevant representation (RR-052), which is reflected in this SoCG. Furthermore, the Applicants and the MMO agreed that due to time constraints some of the outstanding matters requiring engagement between the MMO and its advisor Cefas, would not be addressed within the draft SoCG, but rather that the engagement will be reflected in the MMO's written representation submission into the examination at Deadline 1 and in an updated SoCG for submission at Deadline 3.
20. The above general engagement has been retained within this final version of the SoCG in order to provide an audit trail for the MMO of the engagement that was undertaken.

2.1 Marine Geology, Oceanography and Physical Processes

21. Each project has the potential to impact upon marine geology and physical processes. **Chapter 7 Marine Geology, Oceanography and Physical Processes** of the Environmental Statement (ES) (APP-055) provides an assessment of the significance of these impacts.
22. **Table 2.1** provides an overview of meetings and correspondence undertaken with the MMO regarding marine geology, oceanography and physical processes.
23. **Table 2.2** provides areas of agreement and disagreement with the MMO regarding marine geology, oceanography and physical processes.
24. Further details on the stakeholder engagement process for marine geology, oceanography and physical processes can be found in the **Consultation Report** (APP-029).

Table 2.1 Summary of Consultation with the MMO regarding Marine Geology, Oceanography and Physical Processes

Date	Contact Type	Topic
Pre-Application		
12 th April 2017	Meeting	Agreement of method statement.
9 th August 2017	Briefing note	Agreement sought on cable route updates, data collection strategy and approach to EIA.
8 th November 2017	Briefing note	Wave modelling: agreement sought on scope of modelling and the cumulative assessment.
15 th December 2017	Briefing note	Benthic ecology survey sampling strategy: agreement sought that the benthic sampling strategy for the cable corridor is sufficient for EIA purposes.
27 th February 2018	Briefing note	Formal note sent to all ETG stakeholders outlining minor changes to the cable corridor. Stakeholders asked to confirm they are satisfied with amendments
21 st March 2018	Meeting	Expert Topic Group 2 – EIA topics Marine Geology Oceanography & Physical Processes; Benthic Ecology and Fish Ecology discussed with a focus on data requirements and the impacts to be assessed.
21 st June 2019	Meeting	Expert Topic Group 3 – EIA topics Marine Geology Oceanography & Physical Processes; Benthic Ecology and Fish Ecology discussed with a focus on potentially contentious stakeholder comments received at section 42 and how these had been addressed by the Applicants.

Date	Contact Type	Topic
Post-Application		
14 th February 2020	Meeting	First SoCG meeting: To discuss format of SoCG
19 th March 2020	Meeting	Second SoCG meeting: To discuss the Applicants' early responses to the MMO relevant representation comments
31 st July 2020	Meeting	Third SoCG meeting: To discuss the Applicants' formal response to the MMO relevant representation as submitted to the Examining Authority on 11 June 2020 in response to procedural decisions for the submission of early drafts of Statements of Common Ground and Comments on Relevant Representations
9 th September 2020	Meeting	Meeting to discuss the Applicants' responses to the MMO's relevant representation and the areas requiring ongoing engagement.
12 th October 2020	Meeting	Fourth SoCG meeting: To discuss the Applicants' responses to the MMO relevant representation comments and updates to the SoCG.
18 th December 2020	Meeting	Meeting to discuss the MMO's Deadline 3 submission and the Applicants' high level responses to this.
07 th January 2021	Meeting	Meeting to discuss the MMO's Deadline 3 submission and the Applicants' proposed responses and updates to the SoCG.
26 th January 2021	Meeting	Meeting to discuss the MMO's Deadline 4 submission and the Applicants' proposed responses and updates to the SoCG.
22 nd March 2021	Meeting	Final SoCG meeting: Meeting to finalise the SoCG for its submission as final and 'signed' at Deadline 8.

Table 2.2 Marine Geology, Oceanography and Physical Processes

Environmental Impact Assessment						
MMO - 001	Existing Environment	Existing and project-specific survey data is sufficient to inform the assessment.	Agreed	Agreed	Agreed	<p>Discussed at Evidence Plan meetings as outlined in Table 2.1 which agreed the existing environment.</p> <p>Comments received on the Existing Environment from the MMO in their Section 42 response were addressed for the ES (see Appendix 7.1, APP-454).</p> <p>No comments on the Existing Environment were received from the MMO in their Relevant Representation.</p>
MMO - 002	Assessment Methodology	The impact assessment methodologies used for the EIA provide an appropriate approach to assessing potential impacts of the projects.	Agreed	Agreed	Agreed	<p>Discussed at Evidence Plan meetings as outlined in Table 2.1 which agreed the approach to assessment methodologies.</p> <p>Comments received on the Assessment Methodology from the MMO in their Section 42 response were addressed for the ES (see Appendix 7.1, APP-469).</p> <p>No comments on the Assessment Methodology were received from the MMO in their Relevant Representation.</p>

ID	Topic	Statement	East Anglia ONE North Limited position	East Anglia TWO Limited position	MMO position	Notes
		The worst case scenario presented in the assessment is appropriate.	Agreed.	Agreed	Agreed	<p>Discussed at Evidence Plan meetings as outlined in Table 2.1 which agreed the approach to worst case scenario.</p> <p>Comments received on the worst case from the MMO in their Section 42 response were addressed for the ES (see Appendix 7.1, APP-454).</p> <p>No comments on the worst case scenario were received from the MMO in their Relevant Representation.</p>

ID	Topic	Statement	East Anglia ONE North Limited position	East Anglia TWO Limited position	MMO position	Notes
MMO - 003	Assessment Conclusions	The conclusions of the assessment of impacts for construction, operation and decommissioning are agreed.	Agreed	Agreed	Agreed	<p>Comments received on the assessment conclusions from the MMO in their Section 42 response were addressed for the ES (see Appendix 7.1, APP-454).</p> <p>Comments on the assessment conclusions were received from the MMO in their Relevant Representation. Responses to these are provided in section 4.12 of the Applicants' comments on Relevant Representations (AS-036) and Appendix 2 Wave Climatology Clarification Note (AS-039) submitted on the 11th of June 2020. Following review of the Applicants' early responses to the MMO's relevant representation, the MMO confirmed during a meeting on 19th March 2020 that they were satisfied with the responses provided.</p>
		The conclusions of the assessment of cumulative impacts are agreed.	Agreed	Agreed	Agreed	<p>Comments received on the assessment conclusions from the MMO in their Section 42 response were addressed for the ES (see Appendix 7.1, APP-454).</p> <p>Comments on the cumulative assessment conclusions were received from the MMO in their Relevant Representation. Responses to these are provided in Appendix 2 Wave</p>

ID	Topic	Statement	East Anglia ONE North Limited position	East Anglia TWO Limited position	MMO position	Notes
						<p>Climatology Clarification Note (AS-039) of the Applicants' Comments on Relevant Representations (AS-036) submitted on the 11th of June.</p> <p>Following review of the Applicants' early responses to the MMO's relevant representation, the MMO confirmed during a meeting on 19th March 2020 that they were satisfied with the responses provided.</p>
MMO - 004	Mitigation	Given the impacts of the project, the proposed mitigation outlined in the Schedule of Mitigation Offshore (APP-574) and section 7.3.3 of ES Chapter 7 Marine Geology, Oceanography and Physical Processes (APP-055) is appropriate.	Agreed	Agreed	Agreed	<p>Comments received on the assessment conclusions from the MMO in their Section 42 response were addressed for the ES (see Appendix 7.1, APP-454).</p> <p>Comments on mitigation were received from the MMO in their Relevant Representation. Responses to these are provided in Appendix 2 Wave Climatology Clarification Note (AS-039) of the Applicants' Comments on Relevant Representations (AS-036) submitted on the 11th of June 2020.</p> <p>Following review of the Applicants' early responses to the MMO's relevant representation, the MMO confirmed during a</p>

Draft Development Consent Order (DCO)						
MMO - 005	Wording of DCO Requirements and Deemed Marine Licence (DML) Condition(s)	<p>The wording of the following requirements and conditions pertaining to marine geology, oceanography and physical processes are appropriate and adequate:</p> <ul style="list-style-type: none"> Condition 17 of the Generation DML and Condition 13 of the Transmission DML with reference to the development of a Design Plan; Condition 17 of the Generation DML and Condition 13 of the Transmission DML with reference to the development of a Construction Method Statement which will include a Cable Laying Plan and details of scour 	Agreed	Agreed	Agreed	None

ID	Topic	Statement	East Anglia ONE North Limited position	East Anglia TWO Limited position	MMO position	Notes
		<p>protection management and cable protection.</p> <ul style="list-style-type: none"> Paragraph 2(1)(i) of Part 1 of the Generation DML and Paragraph 2(1)(i) of Part 1 of the Transmission DML with reference to the maximum volumes of material to be disposed seaward of MHWS within the East Anglia ONE North and East Anglia TWO order limits. Requirement 10 provided within DCO Schedule 1, Part 3 with reference to a decommissioning programme. 				
Other Matters as Required						
MMO - 006	None	Not applicable.				None

2.2 Marine Water and Sediment Quality

25. Each project has the potential to impact upon marine water and sediment quality. **Chapter 8 Marine Water and Sediment Quality** of the ES (APP-056) provides an assessment of the significance of these impacts.
26. **Table 2.3** provides an overview of meetings and correspondence undertaken with the MMO regarding marine water and sediment quality.
27. **Table 2.4** provides areas of agreement and disagreement with the MMO regarding marine water and sediment quality.
28. Further details on the stakeholder engagement process for marine water and sediment quality can be found in the **Consultation Report** (APP-029).

Table 2.3 Summary of Consultation with MMO regarding Marine Water and Sediment Quality

07 th January 2021	Meeting	Meeting to discuss the MMO's Deadline 3 submission and the Applicants' proposed responses and updates to the SoCG.
26 th January 2021	Meeting	Meeting to discuss the MMO's Deadline 4 submission and the Applicants' proposed responses and updates to the SoCG.
22 nd March 2021	Meeting	Final SoCG meeting: Meeting to finalise the SoCG for its submission as final and 'signed' at Deadline 8.

Table 2.4 Marine Water and Sediment Quality

ID	Topic	Statement	/East Anglia ONE North Limited position	East Anglia TWO Limited position	MMO position	Notes
Environmental Impact Assessment						
MMO – 101	Existing Environment	Sufficient survey data has been collected to inform the assessment.	Agreed	Agreed	Agreed	<p>Discussed at Evidence Plan meetings as outlined in Table 2.3 which agreed the Existing Environment.</p> <p>Comments received on the Existing Environment from the MMO in their Section 42 response were addressed for the ES (see Appendix 8.1, APP-467).</p> <p>No comments on the Existing Environment were received from the MMO in their Relevant Representation.</p> <p>During the Examination period the MMO requested additional contaminant sampling within the offshore cable corridor for which provision was provided for in the updated Draft DCO at Deadline 8 (see ID MMO-105).</p>
MMO – 102	Assessment Methodology	The impact assessment methodologies used for the EIA provide an appropriate approach to assessing potential impacts of the project.	Agreed	Agreed	Agreed	<p>Discussed at Evidence Plan meetings as outlined in Table 2.3 which agreed the approach to assessment methodologies.</p> <p>Comments received on the Assessment Methodology from the MMO in their Section 42 response were addressed for the ES (see Appendix 8.1, APP-467).</p>

ID	Topic	Statement	/East Anglia ONE North Limited position	East Anglia TWO Limited position	MMO position	Notes
						No comments on the Assessment Methodology were received from the MMO in their Relevant Representation.
		The worst case scenario presented in the assessment is appropriate.	Agreed	Agreed	Agreed	Discussed at Evidence Plan meetings as outlined in Table 2.3 which agreed the approach to the worst case scenario. Comments received on the worst case scenario from the MMO in their Section 42 response were addressed for the ES (see Appendix 8.1, APP-467). No comments on the worst case scenario were received from the MMO in their Relevant Representation.
MMO – 103	Assessment Conclusions	The conclusions of the assessment of impacts for construction, operation and decommissioning are agreed.	Agreed	Agreed	Agreed	Discussed at Evidence Plan meetings as outlined in Table 2.3 which agreed the approach to the assessment of the conclusions of impacts. Comments received on the conclusions of impacts from the MMO in their Section 42 response were addressed for the ES (see Appendix 8.1, APP-469). No comments on the conclusions of impacts were received from the MMO in their Relevant Representation.

ID	Topic	Statement	/East Anglia ONE North Limited position	East Anglia TWO Limited position	MMO position	Notes
		The conclusions of the assessment of cumulative impacts are agreed.	Agreed	Agreed	Agreed	Discussed at Evidence Plan meetings as outlined in Table 2.3 which agreed the approach to the assessment of the conclusions of cumulative impacts. Comments received on the conclusions of cumulative impacts from the MMO in their Section 42 response were addressed for the ES (see Appendix 8.1, APP-467). No comments on the conclusions of cumulative impacts were received from the MMO in their Relevant Representation.
MMO – 104	Mitigation	Given the impacts of the project, the proposed mitigation outlined in the Schedule of Mitigation Offshore (APP-574) and section 8.3.3 of ES Chapter 8 Marine Water and Sediment Quality (APP-056) is appropriate.	Agreed	Agreed	Agreed	Discussed at Evidence Plan meetings as outlined in Table 2.3 which agreed the approach to mitigation measures. Comments received on mitigation from the MMO in their Section 42 response were addressed for the ES (see Appendix 8.1, APP-467). No comments on mitigation were received from the MMO in their Relevant Representation.
Draft Development Consent Order (DCO)						

ID	Topic	Statement	/East Anglia ONE North Limited position	East Anglia TWO Limited position	MMO position	Notes
MMO – 105	Wording of DCO Requirements and DML Conditions	<p>The wording of the following requirements and conditions pertaining to marine water and sediment quality are appropriate and adequate:</p> <ul style="list-style-type: none"> • Condition 17 of the Generation DML and Condition 13 of the Transmission DML with reference to the Marine Pollution Contingency Plan (within the Project Environmental Management Plan) to minimise impacts of spills and discharges on the marine environment. • Condition 17 of the Generation DML and Condition 13 of the Transmission DML with reference to a Construction Method Statement. 	Agreed	Agreed	Agreed	None

ID	Topic	Statement	/East Anglia ONE North Limited position	East Anglia TWO Limited position	MMO position	Notes
		<ul style="list-style-type: none"> Condition 30 of the Generation DML and Condition 26 of the Transmission DML with reference to sediment sampling for contaminants. 				
Other Matters as Required						
MMO – 106	None	Not applicable.				None

2.3 Benthic Ecology

29. Each project has the potential to impact upon benthic ecology. **Chapter 9 Benthic Ecology** of the ES (APP-057) provides an assessment of the significance of these impacts.
30. **Table 2.5** provides an overview of meetings and correspondence undertaken with the MMO regarding benthic ecology.
31. **Table 2.6** provides areas of agreement and disagreement with the MMO regarding benthic ecology.
32. Further details on the stakeholder engagement process for benthic ecology can be found in the **Consultation Report** (APP-029).

Table 2.5 Summary of Consultation with MMO regarding Benthic Ecology

Date	Contact Type	Topic

Environmental Impact Assessment						
MMO – 301	Existing Environment	Sufficient survey data has been collected to inform the assessment.	Agreed	Agreed	Agreed	<p>Discussed at Evidence Plan meetings as outlined in Table 2.7 which agreed the Existing Environment.</p> <p>Comments received on the Existing Environment from the MMO in their Section 42 response were addressed for the ES (see Appendix 10.1, APP-462).</p> <p>Comments on the Existing Environment were received from the MMO in their Relevant Representation. Responses to these are provided in section 4.12 of the Applicants' Comments on Relevant Representations (AS-036) submitted on the 11th of June.</p> <p>Following review of the Applicants' early responses to the MMO's relevant representation, the MMO requested during a meeting on 19th March 2020 that additional figures displaying 10 year IHLS data for the January surveys only be mapped against noise contours for both the fleeing and stationary models. These are now provided in Figures 6 and 7 of the Fish and Shellfish Ecology Clarification Note (AS-040).</p>
MMO – 302	Assessment Methodology	The impact assessment methodologies used for the EIA provide an	Agreed	Agreed	Agreed	Discussed at Evidence Plan meetings as outlined in Table 2.7 which agreed the approach to assessment methodologies.

ID	Topic	Statement	East Anglia ONE North Limited position	East Anglia TWO Limited position	MMO position	Notes
		appropriate approach to assessing potential impacts of the project.				<p>Comments received on the Assessment Methodology from the MMO in their Section 42 response were addressed for the ES (see Appendix 10.1, APP-463).</p> <p>Comments on the assessment methodology were received from the MMO in their Relevant Representation. Responses to these are provided in section 4.12 of the Applicants' Comments on Relevant Representations (AS-036) submitted on the 11th of June.</p> <p>Following review of the Applicants' early responses to the MMO's relevant representation, the MMO agreed at a meeting on the 19th March 2020 that whilst their relevant representation requested single strike sound exposure levels (SELss) to be mapped to understand potential impact ranges, peak Sound Pressure Level (SPL_{peak}) ranges could instead be mapped against a 'heat map' of herring spawning data from IHLS January surveys. The Applicants provided an updated response to this in their Comments on Relevant Representations (AS-036) submitted on the 11th June 2020 and provided figures within Appendix 3 Fish Clarification Note (AS-040).</p> <p><u>Herring Spawning Seasonal Restriction / Potential Behavioural / TTS Impacts</u></p> <p>The Applicants refer to row 3.8.2 of the Applicants' Comments on MMO's Deadline 3 Submissions (REP4-019) which provides the positions of the MMO and the</p>

ID	Topic	Statement	East Anglia ONE North Limited position	East Anglia TWO Limited position	MMO position	Notes
						<p>Applicants regarding potential behavioural impacts on spawning herring from piling for which additional mapping of noise contours was requested by Cefas fish and underwater noise experts at a meeting on the 12th of October 2020.</p> <p>This is now Agreed as a Herring Spawning restriction condition has been included in the draft DCO (document reference 3.1), which is set out in row MMO-305.</p>
		The worst case scenario presented in the assessment is appropriate.	Agreed	Agreed	Agreed	<p>Discussed at Evidence Plan meetings as outlined in Table 2.7 which agreed the approach to the worst case scenario.</p> <p>Comments received on the worst case scenario from the MMO in their Section 42 response were addressed for the ES (see Appendix 10.1, APP-462).</p> <p>Comments on the worst case scenario were received from the MMO in their Relevant Representation. Responses to these are provided in section 4.12 of the Applicants' Comments on Relevant Representations (AS-036) submitted on the 11th of June.</p> <p>Following review of the Applicants' early responses to the MMO's relevant representation, the MMO confirmed during a meeting on 19th March 2020 that they were satisfied with the responses provided.</p> <p>Following the Applicants addition to the project design envelopes of monopiles for offshore platforms (REP3-052),</p>

ID	Topic	Statement	East Anglia ONE North Limited position	East Anglia TWO Limited position	MMO position	Notes
						the MMO queried whether this had been assessed. The Applicants reiterated that the worst case assessment for wind turbines covered monopiles for substations because all of the substation monopile parameters accord with that for a wind turbine. The MMO subsequently agreed that this matter was closed.
MMO – 303	Assessment Conclusions	The conclusions of the assessment of impacts for construction, operation and decommissioning are agreed.	Agreed	Agreed	Agreed	<p>Discussed at Evidence Plan meetings as outlined in Table 2.7 which agreed the approach to the assessment of the conclusions of impacts.</p> <p>Comments received on the conclusions of impacts from the MMO in their Section 42 response were addressed for the ES (see Appendix 10.1, APP-462).</p> <p>Comments on the assessment conclusions were received from the MMO in their Relevant Representation. Responses to these are provided in section 4.12 of the Applicants' Comments on Relevant Representations (AS-036) submitted on the 11th of June.</p> <p>Following review of the Applicants' early responses to the MMO's relevant representation, the MMO confirmed during a meeting on 19th March 2020 that they were satisfied with the responses provided.</p> <p><u>Herring Spawning Seasonal Restriction / Potential Behavioural / TTS Impacts</u></p>

ID	Topic	Statement	East Anglia ONE North Limited position	East Anglia TWO Limited position	MMO position	Notes
						<p>The Applicants refer to row 3.8.2 of the Applicants' Comments on MMO's Deadline 3 Submissions (REP4-019) which provides the positions of the MMO and the Applicants regarding potential behavioural impacts on spawning herring from piling for which additional mapping of noise contours was requested by Cefas fish and underwater noise experts at a meeting on the 12th of October 2020.</p> <p>The MMO subsequently requested for a seasonal restriction to be applied to minimise potential behavioural impacts on spawning herring to which, notwithstanding the Applicants position that a seasonal restriction was not required, the Applicants have agreed to accept the inclusion of a condition (see row MMO-306).</p>
		The conclusions of the assessment of cumulative impacts are agreed.	Agreed	Agreed	Agreed	<p>Discussed at Evidence Plan meetings as outlined in Table 2.7 which agreed the approach to the assessment of the conclusions of impacts.</p> <p>Comments received on the conclusions of impacts from the MMO in their Section 42 response were addressed for the ES (see Appendix 10.1, APP-462).</p> <p>Comments on the cumulative assessment conclusions were received from the MMO in their Relevant Representation. Responses to these are provided in 4.12 of the Applicants' Comments on Relevant Representations (AS-036) submitted on the 11th of June.</p>

ID	Topic	Statement	East Anglia ONE North Limited position	East Anglia TWO Limited position	MMO position	Notes
						<p>Following review of the Applicants' early responses to the MMO's relevant representation, the MMO confirmed during a meeting on 19th March 2020 that they were satisfied with the responses provided.</p> <p><u>Herring Spawning Seasonal Restriction / Potential Behavioural Impacts</u></p> <p>The Applicants refer to row 3.8.2 of the <i>Applicants' Comments on MMO's Deadline 3 Submissions</i> (REP4-019) which provides the positions of the MMO and the Applicants regarding potential behavioural impacts on spawning herring from piling for which additional mapping of noise contours was requested by Cefas fish and underwater noise experts at a meeting on the 12th of October 2020.</p> <p>The MMO subsequently requested for a seasonal restriction to be applied to minimise potential behavioural impacts on spawning herring to which, notwithstanding the Applicants position that a seasonal restriction was not required, the Applicants have agreed to accept the inclusion of a condition (see row MMO-306).</p>
MMO – 304	Mitigation and Monitoring	Given the impacts of the project, the proposed mitigation outlined in the <i>Schedule of Mitigation</i>	Agreed	Agreed	Agreed	The Applicants have agreed to undertake pre- and post-construction monitoring for sandeel which is secured in the updated IPMP submitted at Deadline 6.

ID	Topic	Statement	East Anglia ONE North Limited position	East Anglia TWO Limited position	MMO position	Notes
		Offshore (APP-574) and section 10.3.3 of ES Chapter 10 Fish and Shellfish Ecology (APP-058) is appropriate.				
Draft Development Consent Order (DCO)						
MMO – 305	Wording of DCO Requirements and DML Conditions	<p>The wording of the following requirements and conditions pertaining to fish and shellfish ecology are appropriate and adequate:</p> <ul style="list-style-type: none"> Condition 17 of the Generation DML and Condition 13 of the Transmission DML with reference to the development of a Construction Method Statement which will include a Cable Laying Plan which will provide details of measures 	Agreed	Agreed	Agreed	<p>Sandeel monitoring:</p> <p>The Applicants have agreed to undertake pre- and post-construction monitoring for sandeel which will be secured in the updated IPMP submitted at Deadline 6 (noting that conditions 20 and 22 for the Generation DML and 16 and 18 of the Transmission DML secure pre and post construction surveys/monitoring in accordance with the IPMP).</p> <p>The Applicants and the MMO are therefore Agreed on this matter.</p>

ID	Topic	Statement	East Anglia ONE North Limited position	East Anglia TWO Limited position	MMO position	Notes
		<p>which seek to reduce the effect of EMF and the need for surface cable protection.</p> <ul style="list-style-type: none"> • Condition 17 of the Generation DML and Condition 13 of the Transmission DML with reference to the development of a construction programme. • Condition 16 of the Generation DML and Condition 12 of the Transmission DML with reference to a marine mammal mitigation protocol in order to minimise the impact of noise on fish and shellfish arising as a result of UXO clearance activities. • Condition 17 of the Generation DML and Condition 13 of

2.6 Marine Mammals

41. Each project has the potential to impact upon marine mammals. **Chapter 11 Marine Mammals** of the ES (APP-059) provides an assessment of the significance of these impacts.
42. **Table 2.11** provides an overview of meetings and correspondence undertaken with the MMO regarding marine mammals.
43. **Table 2.12** provides areas of agreement and disagreement with the MMO regarding marine mammals.
44. Further details on the stakeholder engagement process for marine mammals can be found in the **Consultation Report** (APP-029).

Table 2.11 Summary of Consultation with the MMO regarding Marine Mammals

Date	Contact Type	Topic
Pre-Application		
30 th May 2017	Meeting	Expert Topic Group 1 – Marine Mammal survey methodology and impacts to be assessed: agreement sought that the scope is sufficient for EIA purposes.
25 th September 2017	Meeting	Marine Mammals Method Statement- and further comments received from stakeholders
27 th February 2018	Briefing Note	Formal note sent to all ETG stakeholders outlining minor changes to the cable corridor. Stakeholders asked to confirm they are satisfied with amendments
6 th March 2018	Meeting	Expert Topic Group 2- Agreement sought: items to be scoped out of EIA – EMF effects, physical barrier effects and disturbance at seal haul out sites. Agreement sought regarding marine mammal density estimates, population data and underwater noise modelling.
9 th January 2019	Meeting	Expert Topic Group 3- Agreement sought – approach regarding the cumulative impact assessment with other projects, commitment regarding concurrent piling and proposed mitigation strategy via the Site Integrity Plan.
21 st June 2018	Meeting	Expert Topic Group 4 – Agreement sought: Presentation of NOAA criteria in the ES and approach to consultation and SIP and MMMP sign off.

Date	Contact Type	Topic
Post-Application		
14 th February 2020	Meeting	First SoCG meeting: To discuss format of SoCG
19 th March 2020	Meeting	Second SoCG meeting: To discuss the Applicants' early responses to the MMO relevant representation comments
31 st July 2020	Meeting	Third SoCG meeting: To discuss the Applicants' formal response to the MMO relevant representation as submitted to the Examining Authority on 11 June 2020 in response to procedural decisions for the submission of early drafts of Statements of Common Ground and Comments on Relevant Representations
9 th September 2020	Meeting	Meeting to discuss the Applicants' responses to the MMO's relevant representation and the areas requiring ongoing engagement.
12 th October 2020	Meeting	Fourth SoCG meeting: To discuss the Applicants' responses to the MMO relevant representation comments and updates to the SoCG.
18 th December 2020	Meeting	Meeting to discuss the MMO's Deadline 3 submission and the Applicants' high level responses to this.
07 th January 2021	Meeting	Meeting to discuss the MMO's Deadline 3 submission and the Applicants' proposed responses and updates to the SoCG.
26 th January 2021	Meeting	Meeting to discuss the MMO's Deadline 4 submission and the Applicants' proposed responses and updates to the SoCG.
16 February 2021	Meeting / Workshop	Workshop to discuss wording of additional conditions relating to marine mammals and underwater noise
22 nd February 2021	Meeting	Meeting to discuss outstanding matters (general across all EIA topic areas and the draft DCO).
22 nd March 2021	Meeting	Final SoCG meeting: Meeting to finalise the SoCG for its submission as final and 'signed' at Deadline 8. This meeting also discussed underwater noise and sequential piling within a 24-hour period

Table 2.12 Marine Mammals

ID	Topic	Statement	East Anglia ONE North Limited position	East Anglia TWO Limited position	MMO position	Notes
Environmental Impact Assessment						
MMO – 501	Existing Environment	Sufficient survey data has been collected to inform the assessment.	Agreed	Agreed	Agreed	Discussed at Evidence Plan meetings as outlined in Table 2.11 which agreed the Existing Environment. Comments received on the Existing Environment from the MMO in their Section 42 response were addressed for the ES (see Appendix 11.1, APP-465). No comments on the Existing Environment were received from the MMO in their Relevant Representation.
MMO – 502	Assessment Methodology	The impact assessment methodologies used for the EIA provide an appropriate approach to assessing potential impacts of the project.	Agreed	Agreed	Agreed	Discussed at Evidence Plan meetings as outlined in Table 2.11 which agreed the approach to assessment methodologies. Comments received on the Assessment Methodology from the MMO in their Section 42 response were addressed for the ES (see Appendix 11.1, APP-465). Comments on the assessment methodology were received from the MMO in their Relevant Representation. Responses to these are provided in section 4.12 of the Applicants' Comments on

ID	Topic	Statement	East Anglia ONE North Limited position	East Anglia TWO Limited position	MMO position	Notes
						<p>Relevant Representations (AS-036) submitted on the 11th of June.</p> <p>Following review of the Applicants' early responses to the MMO's relevant representation, the MMO confirmed during a meeting on 19th March 2020 that they were satisfied with the responses provided.</p> <p>Update 22 March 2021</p> <p>In response to the MMO submission at Deadline 7 (REP7-068) with regard to marine mammals and sequential piling over a 24 hour period, the Applicants prepared updated modelling data which was presented to the MMO and their advisors, Cefas during the meeting of the 22 March 2021.</p> <p>Update 28 June 2021</p> <p>The Underwater Noise Modelling Update [REP8-040] was submitted into the Examination at Deadline 8 with a final agreed version submitted at Deadline 11 (REP11-045) following further update requests from the MMO. In their Deadline 11 response [REP11-114] the MMO confirmed that the updated Underwater Modelling Document (REP11-045) is acceptable to both the MMO and its scientific advisors:</p>

ID	Topic	Statement	East Anglia ONE North Limited position	East Anglia TWO Limited position	MMO position	Notes
						<i>The MMO welcomes the changes made to the data by the Applicant and welcomes the inclusion of the phrase "If at the installation programme design stage a scenario is identified where two piles may be installed sequentially at a distance greater than 2500m in a 24-hour period, further modelling would be provided, if requested by the MMO" which was agreed between the MMO and the Applicant. The MMO has no outstanding issues remaining and considers this topic to be closed.</i>
		The worst case scenario presented in the assessment is appropriate.	Agreed	Agreed	Agreed	<p>Discussed at Evidence Plan meetings as outlined in Table 2.11 which agreed the approach to the worst case scenario.</p> <p>Comments received on the worst case scenario from the MMO in their Section 42 response were addressed for the ES (see Appendix 11.1, APP-465).</p> <p>No comments on the worst case scenario were received from the MMO in their Relevant Representation.</p> <p>Following the Applicants addition to the project design envelopes of monopiles for offshore platforms (REP3-052), the MMO queried whether this had been assessed. The Applicants reiterated</p>

ID	Topic	Statement	East Anglia ONE North Limited position	East Anglia TWO Limited position	MMO position	Notes
						that the worst case assessment for wind turbines covered monopiles for substations because all of the pile parameters accord with that for a wind turbine. The MMO subsequently agreed that this matter was closed.
MMO – 503	Assessment Conclusions	The conclusions of the assessment of impacts for construction, operation and decommissioning are agreed.	Agreed	Agreed	Agreed	<p>Discussed at Evidence Plan meetings as outlined in Table 2.11 which agreed the approach to the assessment of the conclusions of impacts.</p> <p>Comments received on the conclusions of impacts from the MMO in their Section 42 response were addressed for the ES (see Appendix 11.1, APP-465).</p> <p>No comments on the conclusions of the assessment were received from the MMO in their Relevant Representation.</p> <p>Update 22 March 2021</p> <p>In response to the MMO submission at Deadline 7 (REP7-068) with regard to marine mammals and sequential piling over a 24 hour period, the Applicants prepared updated modelling data which was presented to the MMO and their advisors, Cefas during the meeting of the 22 March 2021.</p>

ID	Topic	Statement	East Anglia ONE North Limited position	East Anglia TWO Limited position	MMO position	Notes
						<p>Update 28 June 2021</p> <p>The Underwater Noise Modelling Update [REP8-040] was submitted into the Examination at Deadline 8 with a final agreed version submitted at Deadline 11 (REP11-045) following further update requests from the MMO. In their Deadline 11 response (REP11-114) the MMO confirmed that the updated Underwater Noise Modelling Document (REP11-045) is acceptable to both the MMO and its scientific advisors (see row MMO – 502).</p>
		The conclusions of the assessment of cumulative impacts are agreed.	Agreed	Agreed	Agreed	<p>Discussed at Evidence Plan meetings as outlined in Table 2.11 which agreed the approach to the assessment of the conclusions of impacts.</p> <p>Comments received on the conclusions of cumulative impacts from the MMO in their Section 42 response were addressed for the ES (see Appendix 11.1, APP-465).</p> <p>No comments on the conclusions of the cumulative assessment were received from the MMO in their Relevant Representation.</p>

ID	Topic	Statement	East Anglia ONE North Limited position	East Anglia TWO Limited position	MMO position	Notes
MMO – 504	Mitigation	Given the impacts of the project, the proposed mitigation outlined in the Schedule of Mitigation Offshore (APP-574) and section 13.3.3 of ES Chapter 11 Marine Mammals (APP-059) is appropriate.	Agreed	Agreed	Agreed	<p>Discussed at Evidence Plan meetings as outlined in Table 2.11 which agreed the approach to mitigation measures.</p> <p>Comments received on mitigation from the MMO in their Section 42 response were addressed for the ES (see Appendix 11.1, APP-465).</p> <p>Comments on mitigation were received from the MMO in their Relevant Representation. Responses to these are provided in section 4.12 of the Applicants' Comments on Relevant Representations (AS-036) submitted at on the 11th of June.</p> <p>Following review of the Applicants' early responses to the MMO's relevant representation, the MMO confirmed during a meeting on 19th March 2020 that they were satisfied with the responses provided.</p>
Draft Development Consent Order (DCO)						
MMO – 505	Wording of DCO Requirements and DML Conditions	<p>The wording of the following requirements and conditions pertaining to marine mammals are appropriate and adequate:</p> <ul style="list-style-type: none"> Condition 26 of the Generation DML and 	Agreed	Agreed	Agreed	<p>With regard to Condition 16 in the Generation DML and Condition 12 in the Transmission DML, please see MMO-606.</p> <p>Site Integrity Plan:</p>

ID	Topic	Statement	East Anglia ONE North Limited position	East Anglia TWO Limited position	MMO position	Notes
		<p>Condition 22 of the Transmission DML with reference to a SNS SAC SIP (Piling).</p> <ul style="list-style-type: none"> Condition 27 of the Generation DML and Condition 23 of the Transmission DML with reference to a SNS SAC SIP (UXO clearance). Condition 28 of the generation DML and Condition 24 of the Transmission DML regarding control of piling and UXO detonations. Condition 21 of the Generation DML and Condition 17 of the Transmission DML regarding monitoring of construction noise Condition 16 of the Generation DML and Condition 12 of the Transmission DML with reference to a marine mammal mitigation protocol 				<p>The MMO requested that the SIP condition be revised to provide for two separate SIP Conditions; one pertaining to piling and one pertaining to UXO clearance. The Applicants agreed to this request and the updated conditions were included within the draft DCO submitted at Deadline 8. The MMO has since confirmed in REP10-049 that this matter is agreed.</p> <p>Control of Piling and UXO detonations:</p> <p>The Condition as set out in the draft DCO (REP7-007) is agreed. See also MMO-701 and MMO-702 MMMP and In-principle SIP</p> <p>Construction monitoring:</p> <p>Condition 21(3) / 17(3) monitoring of construction noise – MMO agreed at ISH15 that the Applicants can revert to original wording with the deletion of ‘Statistically’. This was amended in the updated draft DCO submitted at Deadline 8.</p> <p>Marine mammal monitoring programme:</p> <p>The Applicants updated the IPMP at deadline 6 to secure a marine mammal monitoring (PAM) programme. Conditions 17(1)(c)/13(1)(c),</p>

ID	Topic	Statement	East Anglia ONE North Limited position	East Anglia TWO Limited position	MMO position	Notes
		<p>in order to minimise the impact of noise on marine mammals arising as a result of UXO clearance activities.</p> <ul style="list-style-type: none"> • Condition 17 of the Generation DML and Condition 13 of the Transmission DML with reference to the marine mammal mitigation protocol and hammer energies in respect of piling activities. • Requirement 10 provided within DCO Schedule 1, Part 3 with reference to a decommissioning programme. • Condition 17(1)(c) of the generation DML and Condition 13(1)(c) of the transmission DML with reference to the development of a monitoring plan. • Condition 20(2)(c) of the generation DML and Condition 16(2)(c) of the 				<p>20(2)(c)/16(2)(c) and 22(2)(c)/18(2)(c) secure the pre, during and post construction monitoring for marine mammals in the IPMP, which is agreed with the MMO.</p>

		transmission DML with reference to pre-construction marine mammal monitoring. <ul style="list-style-type: none"> Condition 22(2)(c) of the generation DML and Condition 18(2)(c) of the transmission DML with reference to post-construction marine mammal monitoring. 				
Other Matters as Required						
MMO – 506	None	Not applicable.				None

2.7 Development Consent Order (non-EIA topic specific)

45. **Table 2.13** below provides details of the Agreed or Not Agreed positions with respect to matters that are not encompassed within receptor topic assessments or outline/draft/in-principle plans.

**Table 2.13 Development Consent Order (non-EIA topic specific)**

ID	Topic	Statement	East Anglia ONE North Limited position	East Anglia TWO Limited position	MMO position	Notes
MMO - 601	Wording of DCO Requirements and Conditions	The wording of the following requirement is appropriate and adequate: Benefit of the order (Article 6, Part 2, Principle powers)	Agreed	Agreed	Agreed	None
MMO - 602		The wording of the following requirement is appropriate and adequate: Requirement 13 (landfall construction method statement and monitoring plan)	Agreed	Agreed	Agreed	Requirement 13 has been amended in the updated draft DCO submitted at Deadline 8 to address a request from the MMO to be included as a consultee to the relevant planning authority with regard to approval of the landfall construction method statement.
MMO - 603		The wording of the following Condition is appropriate and adequate: Condition 17(1)(e)(vi) of the Generation DML and Condition 13(1)(e)(vi) of the Transmission DML regarding procedures to be adopted within vessels transit corridors to minimise disturbance to red-throated diver which must be in	Agreed	Agreed	Agreed	At the request of the MMO, the Condition was amended in the updated draft DCO submitted at Deadline 8 to include the period of '1 November to 1 March (inclusive)' during which the best practice protocol for minimising disturbance to red-throated diver must be applied.

ID	Topic	Statement	East Anglia ONE North Limited position	East Anglia TWO Limited position	MMO position	Notes
		accordance with the best practice protocol for minimising disturbance to red-throated diver				
MMO - 604		The wording of the following Condition is appropriate and adequate: Condition 25 of the Generation DML and Condition 21 of the Transmission DML regarding co-operation between East Anglia ONE North and East Anglia TWO.	Agreed	Agreed	Agreed	The MMO considers that the co-operation Condition has been adequately captured in the draft DCO (REP7-007).
MMO - 605		The wording of the following Condition is appropriate and adequate: Condition 31 of the Generation DML and Condition 27 of the Transmission DML regarding a Completion of Construction Close out Report	Agreed	Agreed	Agreed	Condition 31 of the Generation DML and Condition 27 of the Transmission DML regarding a Completion of Construction Close out Report was incorporated into the draft DCO submitted at Deadline 8 (REP8-004) and the MMO confirmed their agreement with the wording in REP10-049.

ID	Topic	Statement	East Anglia ONE North Limited position	East Anglia TWO Limited position	MMO position	Notes
MMO - 606		<p>The wording of the following Condition is appropriate and adequate:</p> <p>Condition 16 of the Generation DML and Condition 12 of the Transmission DML with regard to UXO clearance</p> <ol style="list-style-type: none"> 1. Principle of inclusion of the Condition in the DMLs 2. Wording of the Condition 	<ol style="list-style-type: none"> 1. Agreed 2. Agreed 	<ol style="list-style-type: none"> 1. Agreed 2. Agreed 	<ol style="list-style-type: none"> 1. Not Agreed 2. Agreed 	<p><i>Principle of inclusion of the of the Condition in the DMLs</i></p> <p>The MMO's position with regard to the inclusion of the Conditions for UXO clearance is that such activities should be undertaken through a separate Marine Licence application process. Largely these concerns are in relation to the practicability of managing the high-risk activity.</p> <p><i>Wording of the Condition</i></p> <p>The MMO confirms that without prejudice, the wording of the Condition is Agreed should the Secretary of State include UXO clearance within the DMLs.</p> <p>The Applicants' position is that all of the matters raised by the MMO have been addressed and the Applicants consider that UXO clearance activities are therefore sufficiently controlled within the DMLs and that their inclusion in the DMLs is appropriate and is consistent with the intended purpose of the DCO regime.</p>
MMO - 607		Exemption of the MMO from Arbitration (Schedule 15)	Agreed	Agreed	Agreed	None

ID	Topic	Statement	East Anglia ONE North Limited position	East Anglia TWO Limited position	MMO position	Notes
MMO - 608		Inclusion of Schedule 17 (Certified Documents)	Agreed	Agreed	Agreed	None
MMO - 609		The wording of the following Schedule is appropriate and adequate: Schedule 18 (Compensatory measures)	Agreed	Agreed	Not Agreed	The MMO requested inclusion of a 6-week consultation period for the MMO and other consultees in Part 1(3). The Applicants' position is that they do not consider this level of detail to be appropriate for inclusion in the Schedule. The drafting seeks to provide a clear process and mechanism for the delivery of compensation measures and specific details in relation to timescales for consultation etc. are not considered to be appropriate for inclusion in the Schedule. Such details will be determined by the Secretary of State at the relevant time.

2.8 Draft, Outline and In-Principle Plan Documents

46. A number of draft, outline and in-principle plan documents were submitted with the DCO application. **Table 2.14** lists the plans that are relevant to the MMO and details the Applicants' position, the MMO's position and the subsequent agreement status of each of these plans.

Table 2.14 Draft, Outline and In-Principle Plan Documents

ID	Plan Document	Statement	East Anglia ONE North Limited position	East Anglia TWO Limited position	MMO position	Notes
Minor MMO – 701	Draft MMMP	The draft MMMP is agreed	Agreed	Agreed	Agreed	<p>The Applicants have submitted a MMMP at Deadlines 3 and 7 with a final agreed version submitted at Deadline 8 (document reference 8.14) which provides clarity with regard to UXO clearance as agreed with the MMO:</p> <p><i>“UXO detonation is intended to mean detonation of a single UXO and not detonation of a cluster of UXO purposefully placed together. However, where two or more UXO are found lying next to one another at a proximity where there is a risk that detonation of one UXO might detonate the second or other UXOs, the Applicant must discuss the situation with the MMO and agree the course of action to be taken”.</i></p>
MMO – 702	In-Principle SNS SAC SIP	The In-Principle Site Integrity Plan is agreed	Agreed	Agreed	Agreed	<p>The Applicants have submitted an In-principle SIP at Deadlines 3 and 7 with a final agreed version submitted at Deadline 8 (document reference 8.17) which provides clarity with regard to UXO clearance as agreed with the MMO:</p> <p><i>“UXO detonation is intended to mean detonation of a single UXO and not detonation of a cluster of UXO purposefully placed together. However, where two or more UXO are found lying next to one another at a proximity where there is a risk that detonation of one UXO might detonate the second or other UXOs, the</i></p>

ID	Plan Document	Statement	East Anglia ONE North Limited position	East Anglia TWO Limited position	MMO position	Notes
						<i>Applicant must discuss the situation with the MMO and agree the course of action to be taken”.</i>
MMO – 703	Site Characterisation Report (Windfarm Site)	The Site Characterisation Report (Windfarm Site) is agreed.	Agreed	Agreed	Outstanding	The Site Characterisation Report (Windfarm) is outstanding due to the matter regarding the need for additional sediment contaminants sampling which the Applicants have agreed to undertake post-consent, should consent be granted, in agreement with the MMO (see MMO-105).
MMO – 704	Site Characterisation Report (Offshore Cable Corridor)	The Site Characterisation Report (Offshore Cable Corridor) is agreed.	Agreed	Agreed	Outstanding	The Site Characterisation Report (Offshore Cable Corridor) is outstanding due to the matter regarding the need for additional sediment contaminants sampling which the Applicants have agreed to undertake post-consent, should consent be granted, in agreement with the MMO.
MMO – 705	Outline Offshore Operations and Maintenance Plan (OOOMP)	The outline OOOMP is agreed.	Agreed	Agreed	Not agreed	The MMO position is that the outline OOOMP is Not Agreed due to its inclusion of the installation of cable or scour protection during operation not laid during construction. Full details of the matter are provided in MMO-206).

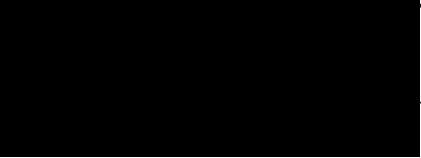

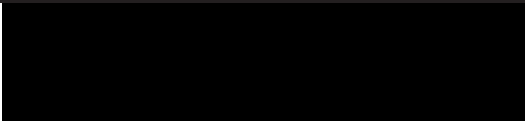

ID	Plan Document	Statement	East Anglia ONE North Limited position	East Anglia TWO Limited position	MMO position	Notes
MMO – 706	In-Principle Monitoring Plan	The In-Principle Monitoring Plan is agreed.	Agreed	Agreed	Agreed	The Applicants have submitted an In-principle Monitoring Plan at Deadlines 3 and 6 with a final agreed version submitted at Deadline 8 (document reference 8.13).
MMO -707	Outline <i>Sabellaria</i> Reef Management Plan	The outline <i>Sabellaria</i> Reef Management Plan is agreed	Agreed	Agreed	Agreed	The Applicants have submitted an In-principle Monitoring Plan at Deadlines 1 and 4 with a final agreed version submitted at Deadline 6 (REP6-039).

3 Signatures

47. The above Statement of Common Ground is agreed between East Anglia TWO Limited, East Anglia ONE North Limited and the Marine Management Organisation on the day specified below.
