1 Guide to Application

1.1 Introduction

1. This document provides a guide to East Anglia TWO Limited's (the "Applicant") Development Consent Order (DCO) application for the East Anglia TWO Offshore Wind Farm (the "Project"). It sets out which document version is the most up to date.
2. This is a live document and will be updated when updates or revisions to existing documents are made and new documents are submitted to the Planning Inspectorate.

1.2 Master Document List

3. The master document list table is set out on the following pages and provides a full list of all the documents submitted to date, indicating either the latest revision (if applicable) or when a new document was submitted.
4. For ease of navigation these documents are grouped by volumes as follows:

| Volume Number | Volume Title | Details |
|---------------|------------------------------------|---|
| 1 | Application Form | Provides details of the specific application information required by the Planning Inspectorate |
| 2 | Plans | Contains the plans which show the location of the Projects and the works proposed |
| 3 | Development Consent Order | Outlines the legal powers sought by the Applicant to construct and maintain the Projects |
| 4 | Compulsory Acquisition Information | Provides details of the powers of compulsory acquisition that are sought |
| 5 | Reports/Statements | Contains documents required to be submitted with the DCO application |
| 6 | Environmental Impact Assessment | Contains information showing how the Applicant has assessed the potential impact on the environment |

| Volume Number | Volume Title | Details |
|---------------|---|---|
| 7 | Additional information for specific types of infrastructure | Contains specified documents required to be submitted for an application for an offshore windfarm |
| 8 | Other Documents | Includes additional documents produced and submitted by the Applicant in support of the application |
| 9 | Examination submissions | Includes all documents submitted by the Applicant to the Planning Inspectorate during the course of the Examination |

5. The table below identifies the files for the documents produced for submission and submitted to the Examination. This is a live document and will be updated when updates or revisions to existing documents are made and new documents are submitted to the Planning Inspectorate. The table identifies the volume, title, submission date and version of the document.
6. The green colour coding in the right-hand column indicates that a document is the most recent version, and the amber colour coding indicates that the document has been superseded by a later version, which will be logged alongside the appropriate deadline. Section 9 of the table below tracks when either new documents or updated documents have been submitted to the Examination at each deadline.
7. The Examination Documents adopt the following format for document referencing: "ExA.[*shortened document name*].[*Deadline*].[*Version number*]". For example, the Applicant's Comments on Relevant Representations Volume 1 submission document has the following document reference: ExA.RR1.D0.V1.
8. Where an Application Document has been updated and re-submitted pursuant to an Examination deadline, the document referencing will follow the original format but with an updated version number – for example, the Guide to the Application submitted for Deadline 1 is document 1.6 (version 2).
