

**Subject:** Ridiculous scale of proposals for East Suffolk

Dear Kwasi Kwarteng

We wish to formally object to the scale of proposals for energy development in this area of Suffolk.

The onshore proposals are vastly out of scale with this area which is sensitive, consisting of a whole Area Of Natural Beauty and with limited road access

The scale of proposals is way out of scale with the local plans for the area

The environmental impact would be appalling in terms of pollution, traffic impact, erosion of soil etc
