Excellent this coast is just not suitable for such developments as proposed and as for Boris announcing 100 million for Sizewell C paid for by taxpayers the mind boggles , this money is needed to stop child poverty and help elderly people and everyone facing large fuel bills , the NHS will end and it will be back to pre 1948 when people could not afford a doctor and treatable conditions went untreated we cannot all afford private insurance and judging by my recent VET bills {£60 each injection} we might all be struggling , I wonder what my [REDACTED] would cost? End of today's rant. [REDACTED] came in for a coffee and he tells me there are already problems with sea encroachment near the Martello Tower which the Yacht Club are watching with interest.
