2. INTRODUCTION AND SCOPE

2.1 OVERVIEW

ScottishPower Renewables and Vattenfall have been working collaboratively on the delivery of the lesser black-backed gull (LBBG) compensation requirements for East Anglia ONE North and TWO (hereafter referred to as the 'East Anglia Projects') and Norfolk Boreas and Norfolk Vanguard (hereafter referred to as the 'Norfolk Projects'). Further details of the collaborative approach are provided in Section 1.2 and 1.3 of the LBBG Implementation and Monitoring Plan (LBBIMP).

Under the Norfolk Projects and East Anglia Projects' consents, there are requirements to set up LBBG Compensation Steering Groups (LBBCSG) to discuss and agree the delivery of LBBG compensation. The Norfolk Projects, due to their requirement to deliver a greater level of compensation, set up the LBBCSG and took a secretarial role. Representatives of the East Anglia Projects were in attendance for the third and fourth LBBCSG Meetings (12th August 2022 and 5th October 2022, respectively).

This predator control LBBIMP has been prepared pursuant to Paragraph 3 of Schedule 18, Part 2 of the East Anglia ONE North DCO and Paragraph 3 of Schedule 18, Part 2 of the East Anglia TWO DCO; both hereafter referred to as the "compensation schedules".

During the third Norfolk Project's LBBCSG it was agreed that any discussions and subsequent agreements on compensation that were made at the Norfolk Projects-led meetings are applicable for the East Anglia Projects and therefore have been carried through into the East Anglia ONE North and TWO LBBIMP.

On the basis of this agreement, ScottishPower Renewables has prepared this Agreement Log utilising agreements made between the Norfolk Projects and members of the LBBCSG. The Agreement Log has been updated to reflect specific comments and positions for the East Anglia Projects. ScottishPower Renewables has sought to confirm agreement on these matters with the LBBCSG.

A consultation report has been produced by the Norfolk Projects¹. This reports on consultation which has occurred to date in order to develop the LBBG compensation for the Norfolk Projects and the East Anglia Projects, collectively.

2.2 THE LBBG COMPENSATION STEERING GROUP MEMBERS

The members of the LBBCSG include;

- East Anglia ONE North and TWO;
- The Norfolk Projects;
- East Suffolk Council (ESC),
- Marine Management Organisation (MMO),
- Natural England (NE), and
- Royal Society for the Protection of Birds (RSPB).

The independent chairperson appointed to oversee the LBBCSG was Jim McKie.

The Steering Group aims to:

- Deliver the LBBG compensation in an effective and timely manner,
- Establish an appropriate monitoring plan to ensure continued success of the LBBG compensation, and
- Develop appropriate adaptive management measures to ensure LBBG compensation is effective.

The agreement log has been structured to reflect the topics of discussion between the members of the LBBCSG. The agreement log outlines all topic specific matters agreed, not agreed and any actions to resolve the areas of disagreement. Matters that are not agreed will be the subject of ongoing discussion wherever possible to resolve or refine the extent of disagreement between the parties.

3. AGREEMENT LOG

See below the Agreement log. The LBBCSG positions presented in the log are as per the final iteration of the Agreement Log as submitted alongside the Norfolk Project's LBBIMP². Should there be any East Anglia Projects specific queries from the LBBCSG members following review of the East Anglia Projects' LBBIMP then these positions will be updated.

Location, (Schedule 18 Part 2, paragraph 3 (a) of the East Anglia ONE North and TWO DCOs).	Two proposed locations on the Cobra Mist land were initially presented at LBBCSG meeting 1. A preferred option in the south and a backup option in the North. However, following further discussions with the landowner and agreement from the LBBCSG, the backup northern one has been removed from consideration.	Email received 12/05/2022 stating "I can confirm that subject to the outcome of the structure survey and provision of further details on the plans Natural England sees no obvious constraints which could restrict/prohibit the use of the 6ha to the East of Cobra Mist buildings as compensation for LBBG for the Norfolk projects and possibly EA1N and EA2. However, it should be noted that this intervention will not resolve the wider issues in relation to the SSSI site management, either within the 6ha or the	When site was presented during LBBCSG meeting 1 no objections were raised to either site. MMO did not attend the second meeting. No objections raised in relation to amended site boundary (12/08/2022).	When site was presented during LBBCSG meeting 1 no objections were raised to either site. No objections raised in relation to amended site boundary (12/08/2022).	In Principle Agreement at meeting 2 subject to seeing the final site suitability survey report. No objections raised in relation to amended site boundary (12/08/2022).	The East Anglia Projects will deliver compensation collaboratively with the Norfolk Projects at Lowestoft as agreed. Details are presented in the LBBIMP. Agreement for Lease awarded for the site (29/07/2022).

		wider SSSI unit” No objections raised in relation to amended site boundary (12/08/2022).					
Predator Proof Fencing Design (Schedule 18 Part 2, paragraph 3 (b) of the East Anglia ONE North and TWO DCOs).	The design parameters were presented at LBBCSG meeting 2 and the Invitation to Tender (ITT) have been issued to contractors using this as the design basis.	Following circulation of the specifications provided with the ITT, NE provided advice in email sent: 05/07/2022 at 15:45. The advice provided aligned with the Specifications provided to fence suppliers. Therefore, in principle agreement has now been reached pending comments from site manager (12/08/2022).	No Comment	ESC defers to NE and RSPB for technical expertise regarding design.	Following circulation of the specifications provided with the ITT, RSPB provided advice in email sent: 18/07/2022 at 09:17, specifically advice on mesh size and recommends larger than the 20mm mentioned by NE. Therefore, agreement has now been reached (12/08/2022).	The East Anglia Projects will deliver compensation collaboratively with the Norfolk Projects utilising the agreed design structure. Details are presented in the LBBIMP (construction of the fence has now been installed and completed in February 2023).	
Programme							
Programme (Schedule 18 Part 2, paragraph 3 (c) of the East Anglia ONE North	The programme is driven by the need for the compensation to be in place four full breeding seasons prior	It is agreed that the programme is suitable to deliver the compensation package in	It is agreed that the programme is suitable to deliver the compensation package in time to	It is agreed that the programme is suitable to deliver the compensation package in time to	It is agreed that the programme is suitable to deliver the compensation package in	The programme is driven by the need for the compensation to be in place four full
