Espoo - Norfolk Vanguard Offshore Wind Farm Transboundary Notification

The Norwegian Environment Agency, as point of contact regarding notification according to the Espoo convention, acknowledge receipt of the notification for Norfolk Vanguard offshore wind farm.

Norway has identified 15 potential offshore wind farm areas in Norwegian waters. Norwegian energy authorities consider the location of the proposed Norfolk Vanguard wind farm to be too far away from those 15 areas to influence wind resources, and consequently do not wish to participate in the further process.

The Environment Agency would like to be kept informed on studies (baseline and monitoring) on sea birds, ducks and migrating birds and their geographical use of the study area. Information on relevant links to web based studies would be sufficient.

Any correspondence should be sent to the Environment Agency (postmottak@miljodir.no and mari.lise.sjong@miljodir.no).

Best regards
Norwegian Environment Agency
