Subject: Norfolk Vanguard - consultation

The Norwegian Environment Agency, as point of contact for the Espoo convention, acknowledge receipt of your notification concerning the application for development consent of Norfolk Vanguard off-shore wind farm of 8th August 2018.

The Agency consulted relevant stakeholders after your notification in 2017, but received no comments relevant for Norway to take further part in the process.

However, the Norwegian Environment Agency would, as a matter of scientific interest, like to have access to any new documentation on migratory birds/sea birds in the actual area.

Regards

Mari Lise Sjong
