Dear Planning Inspectorates,

Accompanied Site Inspection - Tuesday 26 March 2019 10.00am Necton Community Centre, 13 Tun's Road, Necton, PE37 8EH

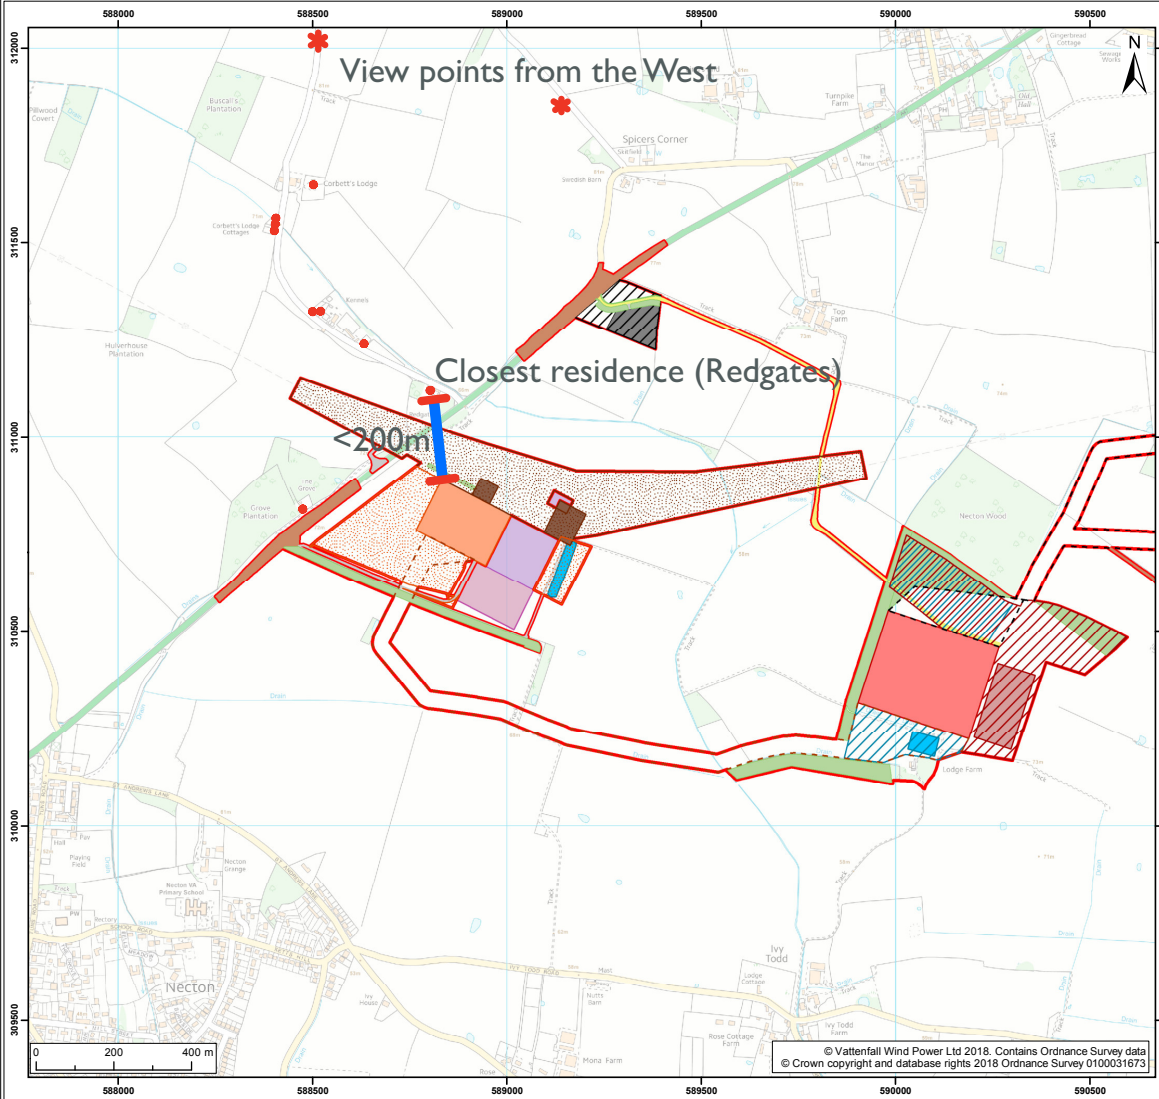

Thank you for taking the time to do a site inspection at Necton. I would like to invite you to view the site from the West of the A47 to gauge an understanding of how visible the existing site is and how far it can be seen from. The National Grid extensions would massively increase this site reducing the distance to its closest property (Redgates) to less than 200m. The extension would also make the site more visible from other properties to the west of the A47. I have attached a map with a few annotations highlighting the closest property to the NG substation extension along with other properties in close proximity, I have also highlighted 2 new proposed viewpoints for your site inspection.

I understand your timings maybe limited on the day and this may not be plausible, if this is the case I can provide photographic images of the site from these viewpoints from the West including one from Redgates House.

Thank you.

Best Regards,
Lucy Sheringham
