1. Screening Assessment – Onshore HVDC Converter/HVAC Substation

1.1 Introduction

1.1.1.1 This annex presents the results of a screening assessment of designated assets in the vicinity of the onshore HVDC converter/HVAC substation. The annex forms part of the assessment of the onshore elements of Hornsea Three on the historic environment (see volume 3, chapter 5: Historic Environment).

1.1.1.2 The annex considers the designated assets within the Hornsea Three historic environment study area as it relates to the onshore HVDC converter/HVAC substation, which comprises:

- 5 km around the onshore HVDC converter/HVAC substation for designated assets such as Grade II listed buildings, Grade II registered parks and gardens, Conservation Areas, etc.; and
- 10 km around the onshore HVDC converter/HVAC substation for designated assets of higher significance (i.e. Grade I and II* listed buildings, registered battlefields, Grade 1 and II* registered parks and gardens, scheduled monuments or World Heritage Sites).

1.1.1.3 A separate annex, volume 6, annex 5.5: Screening Assessment – Onshore HVAC Booster Station, presents the results of a screening assessment of designated assets in the vicinity of the onshore HVAC booster station.

1.1.1.4 Further information on the Hornsea Three historic environment study area is provided in volume 3, chapter 5: Historic Environment.

1.2 Methodology

1.2.1.1 The designated assets considered within the screening assessment were identified as part of a baseline characterisation process, as described in volume 3, chapter 5: Historic Environment.

1.2.1.2 The screening assessment used a Zone of Theoretical Visibility (ZTV) (similar to that generated for the Landscape and Visual Impact Assessment) to identify those heritage assets where significant effects (as a result of Hornsea Three) are unlikely to be incurred. The ZTV used for this assessment models terrain and land-cover, the latter using indicative heights (with heights derived from NEXTMAP 25 surface mapping data). The methodology for the ZTV process is set out in volume 6, annex 4.1: Landscape and Visual Assessment Methodology.

1.2.1.3 Those assets located entirely outside the ZTV have been screened out as have those where distance, orientation and/or vegetation (where appropriate) and the small areas of those large assets lying within the ZTV indicate that there would be no significant effects created by Hornsea Three. In addition, those designated assets located within the built development of Norwich have been screened out as significant effects by Hornsea Three are unlikely on the basis that their setting is formed very largely or entirely by the landscape and built environment of Norwich. Those developments which are on the edge of the built development of Norwich have been considered on a case by case basis as to whether significant effects by Hornsea Three are likely, depending on the setting of the asset.

1.2.1.4 Figure 1.1 shows the locations of the assets listed in Table 1.1 to Table 1.4. Visualisations are presented in volume 6, annex 5.7: Historic Environment Visualisations.
