

I am writing to object to the disruption
of my land.

I have spent time and money making
this a beautiful environment for
wildlife - bats, bees, owls, deers, newts,
and for my children and horses.

I am worried about possible radiation
given off from the cables will
kill my wildlife and make my
children sick and no one can
guarantee me it won't!?

This is our sanctuary - our safe
place to get away from the world
why should anyone have rights
to take that away from us.
