MMO reference: DCO/2016/00001

16 February 2023

Dear Sir or Madam,

### **Non-Material Change Application to the Hornsea Three Offshore Wind Farm Order 2020**

On 12 January 2023, the Marine Management Organisation (MMO) received notice that Orsted Hornsea Project Three (UK) Limited have submitted a non-material change application to The Department for Business, Energy and Industrial Strategy (BEIS) to make a change to the Hornsea Three Offshore Wind Farm Order 2020. The change to the development consent order (DCO) as amended is in relation to the compensation measures for the potential impacts of Hornsea.

This document comprises the MMO's comments in respect of this non-material change application.

The non-material changes being sought are as follows:

- To shorten the length of time that the artificial nesting structures (ANS) need to be in place before operation.

The MMO has no objection to the amendments proposed in the non-material change application.

### **Conclusion**

1. The MMO has no objection to the shortening of the length of time that the ANS need to be in place before operation.
2. Finally, the MMO requests that we are notified of the outcome of the non-material change application.

Yours Sincerely

[Redacted Signature]
