

Submission ID: 923

Natural England notes the updated Habitats Regulations Assessment [REP2-034] submitted by the applicant for Deadline 2. This document includes updated text in relation to the in combination assessment for air quality impacts. As such it addresses the comments made in our Written Representation [REP1-015]. Natural England can confirm we have no further comments on the updated HRA [REP2-034].

We also note that an amended air quality assessment and ecological assessment have been submitted [REP2-032], to rectify an error in the building heights used in the air quality modelling previously undertaken. Natural England is satisfied that the updated modelling has not affected the conclusions of the ecological assessment.
