The Thanet Extension Offshore Wind Farm Project Written Representations to the Examining Authority for Deadline 4C

Dear Sir/ Madam,

The UK Chamber of Shipping is encouraged that the applicant has been engaging with stakeholders throughout this process and have been pleased to attend workshops and enter into discussions on the progress of this development. The UK Chamber considers that positive progress is being made but continues to maintain the position that the safety of navigation within this area continues to be of concern.

Local knowledge and expertise appears to indicate that there is not enough sea room available under the current plans as these waters are used for general navigation as well as for pilotage means. The UK Chamber therefore proposes that more consideration be taken on the inclusion of qualitative information into this process.

The UK Chamber of Shipping continues to assess the information provided by the applicant at deadline 4B and wishes to participate in ISH8 if the Examination Authority are content, being represented by the undersigned.

Yours faithfully,

Fena Boyle
Policy Manager, Safety
