Subject: FW: Material Change to the Thanet Extension Offshore Wind Farm Project Consultation Request

Dear Daniel,

Thank you for the opportunity to comment on the material change to the Thanet Extension Offshore Windfarm Project. The MCA will be providing its comments on the amendment, which introduces a Structures Exclusion Zone, as part of our representation through the examination phase of the application via the Planning Inspectorate.

Kind regards

[REDACTED]

Hi Daniel,

Re: the material change request consultation for the SEZ which closes this Sunday 26 May. I can confirm following consultation that the MMO does not have any specific issues to raise in respect of the proposed change. We will be including an expanded response in our deadline 6 submission to the ExA on Tuesday, however I trust this will assist your reporting in the meantime.

Kind regards,

[REDACTED]

Dear Sirs,

As there have been no material changes to the locations or heights of the turbines, NATS anticipates no impact from the SEZ and its position of NO OBJECTION remains unchanged.

24 May 2019

Dear Sirs

**The Thanet Extension Offshore Wind Farm - Material Change Consultation
Response by the Port of London Authority and Estuary Services Limited**

We act for the Port of London Authority ("the PLA") and Estuary Services Limited ("ESL") in relation to their ongoing participation in the Examination of Vattenfall Wind Power Ltd's ("the Applicant") application for an extension to the Thanet Offshore Wind Farm ("the Application").

By letters dated 25 April 2019, the PLA and ESL were notified of the Applicant's intention to consult on a material change to the Application. The Applicant had produced a package of documents ("the Consultation Documents") in relation to the amendment which was to introduce a Structures Exclusion Zone ("SEZ") within the Order Limits. This letter and the accompanying response document provide the response of both the PLA and ESL to that material change and highlight particular elements of the Consultation Documents which they consider require comment.

As the PLA and ESL have set out in detail during the course of the Examination, their view is that the most appropriate way to secure the continued safety of navigation would be to reduce the red line boundary of the western extent of the proposed scheme. The PLA and ESL acknowledge that a SEZ could potentially achieve the same effect, if the SEZ was sufficiently widely drawn in terms of geographic scope, duration of the exclusion, and structures excluded. The SEZ should ensure that, with the exception of such cables as are necessary to provide a connection to the extended wind farm – no part of the scheme can be constructed, maintained, operated or

decommissioned within the SEZ. The SEZ as currently proposed does not achieve that so, if the Order is made in the form currently proposed, the PLA and ESL will remain concerned about the safety to navigation and the continued viability of their operations to the west of the existing wind farm

Yours faithfully

Winckworth Sherwood LLP

Subject: Thanet Extension Offshore Wind Farm material change consultation [PM-AC.FID3789724]

Dear Daniel,

We write on behalf of Port of Tilbury London Limited and London Gateway Port Limited (the Ports) in response to the above consultation being carried out by Vattenfall Wind Power Limited.

We have reviewed the consultation materials provided. As you know, the two Ports are actively engaged in the Examination of the proposed Thanet Offshore Wind Farm Extension DCO and as such will be providing comments in respect of the Structures Exclusion Zone (SEZ) to the Examining Authority through that process. The Ports have already made representations in respect of the SEZ and will make further representations at the final examination Deadlines.

Kind regards,
