Late submission for Deadline 6A

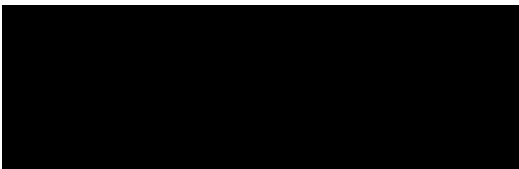

Dear Ms Mignano,

It has been identified that the Applicant's response on the ExA's dDCO commentary submitted at Deadline 6 (REP6-034) is missing 6 comments and their corresponding responses (no's 35-41). Whilst these responses are limited we considered it prudent to inform the ExA as soon as the issue was noticed and hope that this document (Appendix 4 to Deadline 6A) can be accepted as a late submission at Deadline 6A.

Furthermore, the Applicant had expected that a Cefas report on a review of FEPA licence conditions for offshore wind farms was going to be submitted by the MMO, in reference to the ongoing discussions on herring spawning. The Applicant makes reference to this document in Appendix 1 of the Deadline 6A submission, specifically in its response to R17Q 4.1.1., as the document provides the detail and rationale of relevance to the removal of the seasonal restriction for the existing Thanet OWF. Having noted that this has not been included in the MMO's Deadline 6A submission, this is also submitted as a late submission (Appendix 3 to Deadline 6A) such that it can be considered by the ExA in relation to this matter.

Should there be any queries or issues with the documents submitted please contact myself.

Kind regards

Daniel Bates
