Subject: Notification of wish to speak at Open Floor Hearing
Date: 11 June 2019 22:12:40

Dear sirs,

My reference: F R Gomes 20021776

I give notification that I wish to speak at the Open Floor Hearing number two on Monday 22 July 2019, evening. I will be submitting a written representation before the deadline of 26 June 2019.

1 SCOPE OF MY SUBMISSION - ornithology

1.1 I do have serious concerns that the solar park will adversely impact rare species that occur within the development site. Many of these are features of the adjacent designated sites: the special protection area **SPA**, the Ramsar site **RAMSAR**, site of special scientific interest **SSSI** and I therefore understand that they receive a high level of protection from damaging development which risks adversely affecting them. As others are presenting submissions on these issues I do not intend to cover them in my submission. I am aware of what their submissions cover and support them.

1.2 As a local resident I am concerned about the impact on the village from the increase in heavy vehicle traffic on the local road system. Other than mention this here, I will not include my concerns in my written representation because others, expert in this subject, will produce detailed evidence .

1.3 In my submission I will describe the breeding and winter requirements of marsh harriers and the hunting and roosting behaviour of other harrier species in the local area and the likely, adverse affect of the solar park development.

1.4 I will also comment on the management of the mitigation area, specifically in relation to Brent Geese and wintering waders.

With Best Wishes,

R. Gomes
