Dear sir/s

I am not apposed to solar panelling per say but my concern is the environmental impact this will have on the area. This park is much too large and will have an destroy the habitat for many species ,animals ,birds, insects and will the spoil surrounding area for walkers as well. This is a quiet space of outstanding natural beauty much lacking in this wonderful country of ours

I urge those responsible to re think this space either to prevent it completely or considerably reduce the size.

Yours sincerely

Patricia Bensted
