Deadline 6 – Battery Safety and Kent Fire & Rescue Involvement

Dear Hefin,

On behalf of GREAT I am writing regarding the involvement of Kent Fire & Rescue (KFR) in the Cleve Hill development.

As you are aware, KFR were not properly engaged by the Applicant until quite late in the application process and minutes for the first meeting between the two parties, which took place on 20 August 2019, were submitted at Deadline 5.

<https://infrastructure.planninginspectorate.gov.uk/wp-content/uploads/projects/EN010085/EN010085-001143-CHSP%20-%2012.1.9%20Responses%20to%20ExQ2%20Appendix%208.pdf>

In those minutes, KFR set out a large number of requirements, considerations and actions the Applicant needs to take forward.

We request that these requirements are included as conditions, either individually or as part of a central plan, to ensure public safety is adequately considered and monitored.

Kind regards,

Marie King
