12th November 2019

Dear Sirs

I am writing to register my protests at the proposed development of the Cleves Hill Solar Park. I understand that plan involves the extensive coverage of solar panels which will have lithium ion batteries which can catch fire when exposed to salt water. If they catch fire they will release Hydrofluoric gas falling as acid.

The proposed installation is within close proximity to several populated towns.

I am also concerned for the local habitat of wild life living on the marshland that will be affected by this development.

As a local resident, nature lover and environmentalist with a young child at school in the local area I urge you to stop this development.

With Best Wishes

Tracie Peisley
