Subject: Concern

Dear Planning Inspectorate,

I am very concerned about the potential loss of this unique and beautiful area for future generations by building a solar plant on top of it.

I am also concerned about the potential fire hazard the batteries pose especially as I have [REDACTED] and I understand that poisonous gases from these batteries would float into our town should they set fire and that such a fire is relatively likely.

I strongly oppose this location for the solar park and hope very much you will deem it unsuitable.

Best wishes

Alice Beckett
