

LATE SCOPING CONSULTATION RESPONSES

Consultation Bodies have 28 days to respond with any comments, stating either the information that they consider should be included in the Environmental Statement or that they do not have any comments.

Any responses received after the deadline are not considered within the Scoping Opinion but are forwarded to the Applicant for consideration, in accordance with the policy set out in the Planning Inspectorate's Advice Note seven: Environmental Impact Assessment, Screening and Scoping.

The following EIA scoping consultation responses were received after the consultation deadline specified under legislation and therefore did not form part of the Secretary of State's Scoping Opinion.

Dear Ms Pratt

**Scoping Opinion, for Cable route for the Norfolk Boreas Offshore Wind Farm, as to the information to be provided in an Environmental Statement relating to the proposed development
Norfolk Boreas Offshore Wind Farm cable route from Ingworth to Bacton & Happisburgh**

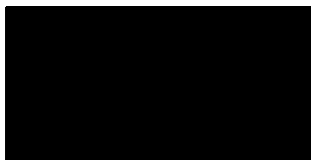

Thank you for your email of 09 May 2017 inviting North Norfolk District Council to comment on the information to be provided in an Environmental Statement (ES) relating to the above proposed development.

The project is the second stage of the Vanguard Offshore Wind Farm and the onshore cabling works are likely to follow the same route of the first stage. It is considered that the Scoping Reports are adequate and address the likely environmental issues with respect to ecology and landscape character, environmental health considerations and coastal processes within the North Norfolk District Council area.

The Council continues to have an open dialogue with Vattenfall with a view to securing the best possible outcomes for the residents and businesses of North Norfolk.

North Norfolk District Council therefore has no further comments to add at this stage.

Yours sincerely

Mr G Lyon
Major Projects Manager
