Dear 

## **Vattenfall - Norfolk Vanguard & Norfolk Boreas Offshore Wind Farms**

### **Meetings to discuss your Land and the Cable Route**

Consents Solutions are working with Vattenfall to establish a cable route for the connection of their proposed wind farms to the National Grid.

The purpose of this letter is to ask you kindly to contact our office on the telephone number shown below, or alternatively email on [vattenfallinnorfolk@consentssolutions.com](mailto:vattenfallinnorfolk@consentssolutions.com), to make an appointment at your convenience. We would like to arrange a suitable date/time to visit you and discuss the proposals. We will be able to supply plans of the proposed cable corridor in your area and look at a preferred cable route within that corridor, together with any access requirements, taking into account your land use.

It is important that landowners and occupiers have an opportunity to comment on the preferred routing and we value your input and local knowledge into the project design.

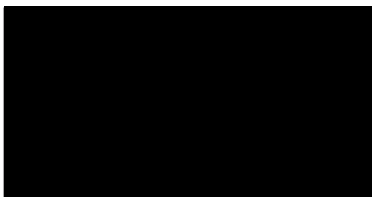

Many landowners have recently attended one of our local public drop-in exhibitions. If you were able to attend one of these events, thank-you for taking some time to speak to the team about the proposals for Norfolk Vanguard and Norfolk Boreas. A further face to face meeting will allow for a more focused conversation about the cable route and your land and land use and would be very much appreciated.

Ref: NV/NB - 1

As a landowner on the preferred cable route, you will also recently have received a Request for Information form from Ardent Management. Ardent are working with Vattenfall and Consent Solutions, identifying all the parties with a land interest along the cable route. We would urge you to complete this form and return to Ardent as it ensures that the project team holds the correct contact information for all those with an interest in the land.

We look forward to hearing from you.

Yours Sincerely

Bob McCarthy  
Consents Solutions Ltd  
On behalf of Vattenfall
