26 October 2018

Dear [REDACTED]

Ref: Land shown on the enclosed plans**NORFOLK BOREAS OFFSHORE WIND FARM****Consultation from 7th November 2018 to 9th December 2018****Section 42/Section 44 Planning Act 2008**

Norfolk Boreas Limited (the **Applicant**) intends to develop and construct an offshore wind farm located approximately 73km from the coast of Norfolk (the **Project**). The Project, located in the southern North Sea, would cover an area of approximately 725km². Offshore cables transmitting power from the Project would make landfall south of Happisburgh. From there buried cables would continue approximately 60km underground to an onshore project substation, and connect into the National Grid substation near Necton, Norfolk.

The Project will have an export capacity of around 1,800 MW and therefore falls within the definition of a Nationally Significant Infrastructure Project (**NSIP**). As a result, the Applicant is required to submit an application for a development consent order (**DCO**) to the Planning Inspectorate, who will examine the application on behalf of the Secretary of State.

The Project is the second offshore wind farm proposal being developed by Vattenfall in this part of the southern North Sea. With the same proposed export capacity of up to 1,800MW, the Norfolk Vanguard Project (also classified as an NSIP), submitted its DCO application to the Planning Inspectorate in June 2018 (**Norfolk Vanguard**). Vattenfall aims to optimise synergies in relation to the development, construction, operation and eventual decommissioning of the two projects, enabling overall impacts to be reduced. If both projects secure consent and progress to construction, these synergies will be realised. However, the Applicant needs to consider the possibility that Norfolk Vanguard may not be built, and therefore proposes to include both scenarios within its Application.

Further information in relation to this can be found in more detail in the Non-Technical Summary of the Preliminary Environmental Information Report (**PEIR**).

Your interest in the Land

Further to a review of title and Land Registry information we have identified that you may have an interest in land which falls within our proposed development area.

Please refer to the set of plans included on the USB device accompanying this letter; showing all affected land within the red line boundary which will include your interest in land. The two scenarios (referred to above) impact your land in different ways. Please see the enclosed Non-Technical Summary of the PEIR together with the plans and Statement of Community Consultation, which show the onshore project substation and the Necton National Grid substation areas, to see how your interest in land is affected under both scenario 1 and scenario 2.

Whilst this information is considered up to date at the time this consultation takes place, this is an ongoing process. The identification of all land interests to which the Project relates is still being finalised prior to submission of the DCO application.

Consultation on the Project

Your feedback will be considered before the Applicant finalises its application to the Planning Inspectorate for a DCO to authorise the Project and will also be reported to the Planning Inspectorate when the application is submitted. Representations you have already made will also be reported.

Consultation documents enclosed

We enclose a copy of the formal notice of the Project proposal under the duty to publicise in accordance with Section 48 of the Planning Act 2008. This contains the full description of the development.

We also enclose a USB device containing electronic copies of:

1. PEIR;
2. Non-Technical Summary of the PEIR;
3. Plans showing the location of the Project;
4. The Consultation Summary Document;
5. The Statement of Community Consultation.

Copies of the PEIR, Non-Technical Summary, and plans are also available at the locations listed in the enclosed formal notice.

This is a formal part of the consultation process and the period for consideration and response to these documents will run from **7th November 2018 to 11.59pm on 9th December 2018**.

Any responses to or other representations in respect of the Project can be made in writing:

1. Addressed to: FREEPOST NORFOLK BOREAS
1. By email to: info@norfolkboreas.co.uk
2. Through completion of a consultation questionnaire available at the public events noted above and drop in locations (also noted above). Digital versions of the questionnaire will be on the USB device and can also be accessed via the Project website www.vattenfall.co.uk/norfolkboreas.

Any response or representation in respect of the formal consultation process **MUST** (i) be received by the Applicant **before 11.59 pm on 9th December 2018** (ii) state in writing the grounds of the response or representation (iii) indicate who is making the response and representation, and (iv) include an address to which correspondence relating to the response or representations may be sent.

If you wish to discuss this consultation, or have issues accessing the documentation, please do not hesitate to contact us at the above postal or email addresses.

If you have any queries about the consultation process or the Project, please call 0800 019 3517.

We look forward to hearing from you.

Yours faithfully

Graham Davey
Project Manager
Norfolk Boreas Limited
