Good afternoon,

Norfolk Boreas Limited (NBL) has published a Statement of Community Consultation (SoCC) in accordance with Section 47(6) of the Planning Act 2008. The SoCC sets out how NBL will consult local communities, residents, businesses, and organisations in the vicinity of the Project and its associated infrastructure. I have attached a copy for you to view - (please note – the attached version is low resolution for email purposes, a high resolution version can be found on the project website - <https://corporate.vattenfall.co.uk/projects/wind-energy-projects/vattenfall-in-norfolk/norfolkboreas/documents/>)

The SoCC is available for public inspection, free of charge, on the project website and in libraries across the area.

The Project, which would be located 73km from the coast of Norfolk at its closest point to land, would consist of between 90 and 200 wind turbines, each having a rated capacity of between 9MW and 20MW, to give an export capacity of up to 1.8GW, providing efficient, cost-effective energy free from fossil-fuels.

In line with the proposals for our sister project – Norfolk Vanguard – the proposed landfall will be south of Happisburgh. From there, underground cables will transmit power generated at the wind farm through to our proposed connection point into the national grid, outside Necton. In the vicinity of the National Grid substation, we will need to build an onshore project substation.

As the Project is a Nationally Significant Infrastructure Project, we will apply to the Planning Inspectorate for a Development Consent Order under the requirements of the Act.

Following the publication of the SoCC, NBL will undertake a statutory period of consultation and invite comments on the Project between **7th November and 11.59pm on 9th December 2018**. The statutory notice attached, which will appear in the Eastern Daily Press, sets out how people can view the SoCC and includes details of the upcoming consultation.

The latest copy of the Vattenfall in Norfolk Newsletter, attached, is being distributed to some 26,000 households within a primary consultation zone (as described in the SoCC) in order to alert them directly to the Statutory Consultation and provide relevant information, including signposting to our website and other means of communication with us.

If you would like any further information please do not hesitate to contact the community relations team on 0800 019 3517 or email info@norfolkboreas.co.uk.

Kind regards

Norfolk Boreas Limited
