Map of Primary Consultation Zone

Addresses within the refined Primary Consultation Zone (PCZ), as specified in the Norfolk Boreas SoCC, totalled approximately 26,000. These properties received a copy of the June 2018, October 2018 and February 2019 newsletters.

In addition to these properties, the October 2018 and February 2019 newsletters were sent to all addresses in the parishes of Oulton, Hoe & Worthing, Swanton Morley, North Tuddenham and Dereham Town Council, to ensure people who could potentially be affected by longer construction access routes to the cable corridor were informed. This increased the total number of addresses to approximately 27,000 and is reflected in the refined PCZ below.
