Dear

12/02/2019

Please find attached the latest edition of our Vattenfall in Norfolk [newsletter](#).

As with previous editions, including the newsletter advertising the recent statutory consultation, this has been sent to more than 12,800 homes and businesses within our Primary Consultation Zone (the area around our proposed onshore infrastructure, required temporarily during construction, and during operation to transmit power and connect to the national grid). The newsletter includes an update on the Norfolk Boreas and Norfolk Vanguard Offshore Wind Farm projects, and announces the publication of Hearing Your Views IV. This is an interim report describing the feedback received during the statutory consultation, undertaken during November – December 2018, to inform refinements to our Norfolk Boreas Offshore Wind Farm proposals prior to submitting a Development Consent Order application to the Planning Inspectorate in June 2019. The newsletter will be posted through local letterboxes, from Wednesday 13th February.

We also attach an Executive Summary of the Hearing Your Views IV report which outlines the key themes raised in the statutory consultation for the Norfolk Boreas Offshore Wind Farm. The full report is available [here](#) or can be found listed on the project [documents](#) page.

We are grateful to all those that participated in the statutory consultation. We have found the continued engagement of communities, landowners, stakeholders and statutory consultees beneficial in helping us to refine our project proposals. This will ensure we are able to develop the most locally appropriate projects while making a significant contribution to addressing the UK's looming energy gap, climate targets and delivering on UK and local socio-economic policies, to build on the strengths and the potential of offshore wind in Norfolk and the wider New Anglia LEP region.

Our web pages are refreshed regularly – please visit our [Out and about](#) page for updates on local activities, and the [Norfolk Vanguard](#) and [Norfolk Boreas](#) pages for project updates.

If you wish to discuss any of the documents or have any queries about the consultation process, please do not hesitate to me via 0800 019 3517 or email info@norfolkboreas.co.uk.

Kind regards,

Graham Davey
Project Manager, Norfolk Boreas Limited
