1 Updated Baseline (Potential Sub-surface Archaeological Remains)

Route Section	AP ID	Other IDs (RHDHV, NHER PrefRef, Headland Field number / AAAs) & Figure Number	Overview	Anticipated heritage significance (importance)	Targeted for priority geophysical survey	High-level geophysical survey results	Located within onshore project area?
Onshore project substation / National Grid Substation Extension and Overhead Line Modification	N/A	NB-AAA1 Figures 28.2b and c, 28.4b and c and 28.6b and c	Previously unrecorded possible Bronze Age barrow / post-medieval post mill (see high-level geophysical survey results column)	High	Yes	A ring-ditch feature, interpreted as the possible ploughed down remains of a Bronze Age funerary monument / or a possible post-medieval post mill.	Yes
Onshore project substation / National Grid Substation Extension and Overhead Line Modification	AP 1	RHDHV 1015 / NHER 4190 / NB-AAA2 Mainly F1, F2, F6 Figures 28.2b and c, 28.4b and c and 28.6b and c	Undated moated site (probably medieval) set within an area of likely associated ditches and boundaries and a further enclosure to the immediate north-west of the moat, of unknown date.	Medium - High	Yes	No Access. To be subject to survey post-consent.	Yes, but interaction is now minimal due to infrastructure / construction works having been sited to minimise impact upon this feature.
Onshore project substation to MA 1b	AP 3	F10 Figures 28.2a (map 22) and 28.2b and c,	Former boundaries or drains, or possibly small tofts, which were extant in the 1940s and are now removed and showing as marks in crops.	Low	Yes	Geophysical survey data partially corroborates former field boundaries captured in the cropmark	Yes, but only partial as the cable route has been routed

Route Section	AP ID	Other IDs (RHDHV, NHER PrefRef, Headland Field number / AAAs) & Figure Number	Overview	Anticipated heritage significance (importance)	Targeted for priority geophysical survey	High-level geophysical survey results	Located within onshore project area?
		28.4a (map 22) and 28.4b and c, and 28.6a (map 22) and 28.6b and c				data and the 1 st Edition OS mapping.	southwards in this location to avoid these cropmark features.
	AP 4	F10 Figures 28.2a, 28.4a and 28.6a (map 22)	Post enclosure field boundaries which were extant in the 1940s and are now removed and visible only as marks in crops.	Low	Yes	Geophysical survey data corroborates former field boundaries captured in the cropmark data and the 1 st Edition OS mapping. The geophysical data acquired at this location does not suggest the presence of any additional notable sub-surface remains in this area.	Yes
	N/A	N/A Figure 28.6a (map 22)	The First Edition OS map for this area depicts two former farm complexes (now demolished) within this section of the route, which are not held as records within the NHER; comprising Wood Farm and Grove Farm. There is potential for sub-surface remains relating to these former farmsteads to exist within this area.	Low	No	N/A To be subject to survey post-consent.	Potential interaction.
MA 1b to MA 2	N/A	N/A	No features of possible archaeological interest were indicated by the aerial photographic	N/A	No	N/A	N/A

Route Section	AP ID	Other IDs (RHDHV, NHER PrefRef, Headland Field number / AAAs) & Figure Number	Overview	Anticipated heritage significance (importance)	Targeted for priority geophysical survey	High-level geophysical survey results	Located within onshore project area?
		Figures 28.2a, 28.4a and 28.6a (map 21)	and LiDAR data assessment within this section of the route and as such, it has not been subject to geophysical survey pre-consent. NHER data recorded within this section of the route are confined to findspots of varying dates.			To be subject to survey post-consent.	
MA 2 to MA 3	N/A	F12 Figures 28.2a, 28.4a and 28.6a (map 21)	Targeted as a result of the area being a trenchless crossing zone location (A47).	Low	Yes (proposed crossing area – A47)	Survey only partially completed on north side of the A47 crossing and not on the south side due to access constraints. Inconclusive results. Likely non-archaeological.	Yes
	AP 19	F13 Figures 28.2a, 28.4a and 28.6a (map 20)	Slight embanked features of unknown origin. Possibly although not conclusively archaeological.	Low	Yes	No access (heavy plough). The area adjacent to AP 19 within RLB to be subject to survey post-consent.	No. Avoided.
	AP 5	F14 and F16 Figure 28.6a (map 19)	Buried ditches, of unknown date which may be part of a former field system.	Low	Yes	The cropmark data is not captured in / or corroborated by the geophysical survey data from F16, with the exception of a former field boundary represented in	Yes

Route Section	AP ID	Other IDs (RHDHV, NHER PrefRef, Headland Field number / AAAs) & Figure Number	Overview	Anticipated heritage significance (importance)	Targeted for priority geophysical survey	High-level geophysical survey results	Located within onshore project area?
						both the cropmark data and 1 st Edition OS mapping.	
	N/A	RHDHV 1255 / NHER 12948 F17 Figure 28.2a (map 19)	Area of a recorded 16th / 17th century pottery kiln.	Medium	Yes	Survey not undertaken due to being located beyond the refined route boundary PEIR to ES.	No. Avoided.
	N/A	F18 and F19 Figure 28.6a (map 19)	Former field boundary features.	Low	Yes (proposed crossing area)	Geophysical data does not indicate any notable sub-surface remains of archaeological interest in this area, with the exception of the former field boundary features, some of which are also represented in the 1 st Edition OS mapping data.	Yes
MA 3 to MA 4	AP 159	RHDHV 1180 / NHER 50699 Figure 28.2a (map 19)	Cropmark showing medieval road.	Medium	No	N/A	Yes
	N/A	F20 and F22 Figure 28.6a (map 18)	Former field boundary features and ponds(?).	Low	Yes (proposed crossing area)	Geophysical data does not indicate any notable sub-surface remains of archaeological interest in this area, with the	Yes

Route Section	AP ID	Other IDs (RHDHV, NHER PrefRef, Headland Field number / AAAs) & Figure Number	Overview	Anticipated heritage significance (importance)	Targeted for priority geophysical survey	High-level geophysical survey results	Located within onshore project area?
						exception of a number of former field boundary features also represented in the 1 st Edition OS mapping data and former ponds, backfilled with ferrous material.	
MA 4 to MA 5a	N/A	F23 and F24 Figure 28.6a (map 17)	No discernible archaeological features. Vicinity of AP 16: Curvilinear ditched enclosures which survive as earthworks in grassland, to the west.	N/A	Yes	Features evident in survey areas are identified as geological in origin only.	Yes
	N/A	F25 to F29 Figure 28.6a (map 16)	Former Field boundary feature visible in F25.	Low	Yes (proposed crossing area – west of the River Wensum)	Features evident are identified as geological in origin, or comprise former field boundaries and ferrous material from a demolished structure on historical maps.	Yes
	N/A	F30 and F31 Figure 28.6a (map 16)	No discernible archaeological features.	N/A	Yes (proposed crossing area – east of the River Wensum)	Features evident are identified as geological in origin.	Yes
	AP 6	RHDHV 811 / NHER 2999 F32, F33 and F38/39	Extensive area of likely multi period eroded field boundaries, tracks, ditches and possible enclosures.	Medium - High	Yes	Geophysical data corroborates the cropmark data to a small degree, although the complexity of	Yes

Route Section	AP ID	Other IDs (RHDHV, NHER PrefRef, Headland Field number / AAAs) & Figure Number	Overview	Anticipated heritage significance (importance)	Targeted for priority geophysical survey	High-level geophysical survey results	Located within onshore project area?
		Figures 28.2a, 28.4a and 28.6a (map 16)				cropmark features as indicated by the cropmark data is not mirrored within the geophysical survey data, which highlights more geological, and agricultural and former field boundary, type anomalies.	
	AP 7	RHDHV 763 / NHER 50874 F33 Figures 28.2a, 28.4a and 28.6a (map 16)	Ring ditch of unidentified origin, maybe a round barrow, stack stand, round house or similar.	High	Yes	Not shown in the geophysical survey data.	No (onshore cable route has been microsited around this feature).
	N/A	RHDHV 1524 / NHER 50771 Figure 28.2a (map 16)	Possible World War Two roadside ammunitions stores or defences.	Low	No	N/A	Yes
	AP 8	RHDHV 700 / NHER 3052 F40 AAA2 Figures 28.2a, 28.4a and 28.6a (map 16)	A cropmarked ring ditch which may be the site of a Bronze Age round barrow.	High	Yes. Not initially targeted but survey area extended due to landowner request.	Ring-ditch feature corroborated by geophysical survey data. The ring-ditch is clearly visible in geophysical survey data. Low magnitude discrete anomalies within the exterior of the ring-	No. Avoided.

Route Section	AP ID	Other IDs (RHDHV, NHER PrefRef, Headland Field number / AAAs) & Figure Number	Overview	Anticipated heritage significance (importance)	Targeted for priority geophysical survey	High-level geophysical survey results	Located within onshore project area?
						ditch may locate several pits.	
	AP 9	RHDHV 1669 / NHER 50642 F40 Figures 28.2a, 28.4a and 28.6a (map 16)	Ditches which may indicate a field system, of unknown date.	Medium - High	Yes. Not initially targeted but survey area extended due to landowner request.	Cropmark features corroborated in part by the geophysical survey data.	No. Avoided.
	AP 10	RHDHV 735 / NHER 50641 F40 Figures 28.2a, 28.4a and 28.6a (map 16)	A possible ring ditch, but this cropmarked feature is possibly agricultural in origin.	Medium - High	Yes	Not corroborated by geophysical survey data. Area of likely geological deposits.	No. The cable has been routed to the north-west to avoid this potential feature.
	AP 11	RHDHV 701 (RHDHV 687 which extends beyond the study area) / NHER 3053 F39 AAA1 Figures 28.2a, 28.4a and 28.6a (map 16)	Three likely Bronze Age round barrows.	High	Yes	Geophysical survey data partially corroborates cropmark features (southern extent of middle ring-ditch is visible on the survey data). No anomalies of archaeological potential have been identified to confirm the presence of the southernmost of the cluster of ring ditches (NHER 3053), although a faint circular	No. The cable has been routed to the south-east to avoid this feature(s).

Route Section	AP ID	Other IDs (RHDHV, NHER PrefRef, Headland Field number / AAAs) & Figure Number	Overview	Anticipated heritage significance (importance)	Targeted for priority geophysical survey	High-level geophysical survey results	Located within onshore project area?
						anomaly in the south-west of corner Area 39a may locate a previously unrecorded ring-ditch.	
	AP 12	RHDHV 1309 / NHER 50640 F39 Figures 28.2a, 28.4a and 28.6a (map 16)	Likely former field boundaries, of unknown date.	Low - Medium	Yes	Only the southern extent of this feature was subject to geophysical survey - the cropmark data was not corroborated by the geophysical survey data.	No. Avoided.
	N/A	RHDHV 947 / NHER 14228 F40/41 Figure 28.2a (map 16)	Possible Roman Road.	Low - Medium	No	N/A	Yes
	AP 14	RHDHV 1104 / NHER 3024 F40b and F41b Figures 28.2a, 28.4a and 28.6a (map 16)	Post-medieval field boundaries.	Low	Yes	Not corroborated by geophysical survey data, which shows predominantly geological, modern agricultural anomalies and a large scatter of ferrous material.	Yes
MA 5a to MA 5b	AP 15	RHDHV 1523 / NHER 50770	Possible WWII structures and defensive installations, no longer extant.	Low	No	N/A	Yes

Route Section	AP ID	Other IDs (RHDHV, NHER PrefRef, Headland Field number / AAAs) & Figure Number	Overview	Anticipated heritage significance (importance)	Targeted for priority geophysical survey	High-level geophysical survey results	Located within onshore project area?
		Figures 28.2a, 28.4a and 28.6a (map 15)					
MA 5b to MA 6	AP 23	Figures 28.2a, 28.4a and 28.6a (map 15)	Possible ditched features.	Low	Yes	Survey not undertaken due to being located beyond the refined route boundary.	No
	N/A	RHDHV 434 / NHER 2796 Figure 28.2a (map 15)	Fen Causeway Roman Road.	Medium	No	N/A	Yes
	AP 31	F43 Figures 28.2a, 28.4a and 28.6a (map 14)	Remains of former field boundaries which are visible as banks in the Lidar and ditches on the air photos.	Low	Yes	Geophysical survey data corroborates LiDAR and cropmark data in part, and shows evidence of a series of faint and fragmented linear and rectilinear anomalies identified as possible archaeology - these anomalies may locate a previously unrecorded enclosure.	No. Route has been moved further to the east.
	N/A	RHDHV 1499 / NHER 13585 Figure 28.2a (map 14)	Midland and Great Northern Joint Railway (Norwich to Cromer via Holt), North Norfolk Railway.	Low	No	N/A	Yes. But will be subject to trenchless crossing (e.g. HDD).

Route Section	AP ID	Other IDs (RHDHV, NHER PrefRef, Headland Field number / AAAs) & Figure Number	Overview	Anticipated heritage significance (importance)	Targeted for priority geophysical survey	High-level geophysical survey results	Located within onshore project area?
	AP 32	F44 Figures 28.2a, 28.4a and 28.6a (map 14)	Former field boundaries of a possible post-medieval field system.	Low	Yes	Geophysical survey data corroborates cropmark data in part, and shows evidence of addition former field boundaries.	No. Route has been moved further to the east.
	N/A	RHDHV 1498 / NHER 13587 Figure 28.2a (map 14)	Route of East Norfolk Railway, Aylsham Branch, including Bure Valley Railway.	Low	No	N/A	Yes. But will be subject to trenchless crossing (e.g. HDD).
	AP 24	RHDHV 977 / NHER 57967 F46 Figures 28.2a, 28.4a and 28.6a (map 14)	Site of chapel with associated round tower, thought to be the site of St Mary's Chapel.	High	Yes	Potential outreach opportunity (community engagement with local interest groups) to be explored - to be considered post-consent, planned around the geophysics at St. Mary's Chapel, Kerdiston. No longer in the vicinity of the cable route.	No
	AP 25	RHDHV 812 / NHER 3150 F46 Figures 28.2a, 28.4a and 28.6a (map 14)	Medieval moat located in close proximity to a possible Iron Age enclosure and ditches.	High	Yes	Potential outreach opportunity (community engagement with local interest groups) to be explored - to be considered post-consent planned around the geophysics at St. Mary's Chapel, Kerdiston.	No

Route Section	AP ID	Other IDs (RHDHV, NHER PrefRef, Headland Field number / AAAs) & Figure Number	Overview	Anticipated heritage significance (importance)	Targeted for priority geophysical survey	High-level geophysical survey results	Located within onshore project area?
						No longer in the vicinity of the cable route.	
	AP 26	F45 and F47 Figures 28.2a, 28.4a and 28.6a (map 14)	Former field boundaries and ditches. The remains of some of the banks to the associated ditches can be seen in the Lidar data.	Low - Medium	Yes	Not corroborated by geophysical survey data.	No
	N/A	RHDHV 966 / NHER 56980 Figure 28.2a (map 14)	A record for multi-period metal objects, including an Early Saxon brooch and a Late Saxon stirrup-strap mount, are recorded to have been discovered at this location.	High	No. May indicate the potential presence of sub-surface features of Anglo-Saxon date to exist – will be subject to metal-detecting post-consent.	N/A	Yes
	AP 27	F49 to F52 Figures 28.2a, 28.4a and 28.6a (map 13)	A group of former field boundaries and ditches.	Low	Yes	Geophysical survey data both corroborates and builds upon cropmark data in this area. Additional potential features to target with post-consent archaeological trial trenching.	Yes

Route Section	AP ID	Other IDs (RHDHV, NHER PrefRef, Headland Field number / AAAs) & Figure Number	Overview	Anticipated heritage significance (importance)	Targeted for priority geophysical survey	High-level geophysical survey results	Located within onshore project area?
MA 6 to MA 7	N/A	F54 AAA3 Figure 28.6a (map 12)	Archaeological anomalies (possible features) visible in geophysical survey data in the form of possible enclosures and other linear features (e.g. possible boundaries, trackways etc.).	Medium - High	Yes (mobilisation area – MA6)	Geophysical survey data indicates presence of dense concentration of archaeological anomalies (features) in the eastern extent of F54, locating a previously unrecorded roadside settlement with a series of interlinking rectangular enclosures.	Yes
	N/A	F55 and F56 Figure 28.6a (map 12)	Features visible include linear features of agricultural origin and a large modern service pipe.	Low	Yes (proposed crossing area)	Geophysical data includes agricultural anomalies as well as features of geological origin, and the large modern service pipe.	Yes
	AP 28	RHDHV 1183 & 698 / NHER 51469 & 21848 F57 AAA4 Figures 28.2a, 28.4a and 28.6a (map 12)	A group of linear ditches possibly part of a field system and enclosures. These features also extend north and north-west of the mapped extend beyond the area of interest. The undated cropmarks and possible Bronze Age ring ditch (RHDHV 698) are in the same location as AP 28 and likely represent the same features. Medieval / post-medieval finds have been reported in the area, including	Low - Medium	Yes	Geophysical data shows a number of features identified in the cropmark data as extending southwards from AP 28, including a number of rectilinear anomalies at the north of the field forming the southern extent of three small enclosures. Several discrete anomalies in the interior of the	Yes. Although the main focus of likely archaeological features are avoided by the revised route.

Route Section	AP ID	Other IDs (RHDHV, NHER PrefRef, Headland Field number / AAAs) & Figure Number	Overview	Anticipated heritage significance (importance)	Targeted for priority geophysical survey	High-level geophysical survey results	Located within onshore project area?
			multi-period pottery of Saxon to medieval date.			enclosures are identified, perhaps locating pits.	
	AP 35	F58 Figures 28.2a, 28.4a and 28.6a (map 12)	Group of linear ditches. These features may be part of a field system and probably related to the Roman settlement activity to the east.	Medium	Yes	Southern extent of the AP feature was surveyed. The geophysical survey data corroborated the cropmark data already recorded.	No.
	N/A	RHDHV 1266 / NHER 23276 F58 Figure 28.2a (map 12)	Site of post-medieval brickworks. Mapped as a Brick Yard on the 1st Edition OS Mapping for the area.	Low	Yes	The geophysical survey data indicates the presence of ferrous material in the vicinity of the brickworks site. Other features include a linear feature identified as possible archaeology, which may be associated with AP 34 below.	Yes
	AP 34	F59 Figures 28.2a, 28.4a and 28.6a (map 12)	Group of linear ditches which may be part of as field system. These features may be related to the Roman settlement to the south-east. It is probable that these features extend further than the mapped extent.	Medium	Yes	The geophysical survey data largely corroborates and in part builds upon the cropmark data at this location, with a few additional linear features visible on the survey data.	Yes
	AP 29	RHDHV 837 / NHER 21848 Figures 28.2a, 28.4a and 28.6a	Probable Roman fort and associated cropmark features.	High	No (beyond project boundary)	N/A	No

Route Section	AP ID	Other IDs (RHDHV, NHER PrefRef, Headland Field number / AAAs) & Figure Number	Overview	Anticipated heritage significance (importance)	Targeted for priority geophysical survey	High-level geophysical survey results	Located within onshore project area?
		(maps 11 and 12)					
	AP 30	RHDHV 1597 / NHER 22903 F60 and F61 AAA5 Figures 28.2a, 28.4a and 28.6a (map 11)	An undated enclosure. It is possible that this site is related to the extensive Roman features to the south.	Medium - High	Yes	Geophysical survey data shows a continuation of the features observed in AP30, extending to the west, with two possible rectilinear enclosures either side of an east / west trackway. Due to the variable magnetic background across the area, low magnetic anomalies which may be archaeological in origin may not be detected by magnetometer. The archaeological potential of this area may therefore be greater than is currently suggested by the survey data. These represent additional features to target with post-consent archaeological trial trenching.	Yes, although the cable has been routed to the north-west to avoid the original extent of the cropmark features identified at this location.
	AP 36	RHDHV 1600 / NHER 29565 F62 and F63	Ditched trackway with linear ditches in close proximity.	Low	Yes	Not corroborated by geophysical survey data.	Yes

Route Section	AP ID	Other IDs (RHDHV, NHER PrefRef, Headland Field number / AAAs) & Figure Number	Overview	Anticipated heritage significance (importance)	Targeted for priority geophysical survey	High-level geophysical survey results	Located within onshore project area?
		Figures 28.2a, 28.4a and 28.6a (map 11)					
	AP 37	F64 Figures 28.2a, 28.4a and 28.6a (map 11)	Possible oval enclosure with two other circular possible ring ditches or enclosures. This area also contains a number of linear ditches which may relate to the possible enclosure.	Medium	Yes	Not corroborated by geophysical survey data.	Yes, although the cable has been routed to avoid the main focus of the cropmarks associated with AP 37.
	N/A	F65 Figure 28.6a (map 11)	Former field boundaries.	Low	Yes (mobilisation area)	Geophysical survey data shows former field boundaries, features of geological origin and ferrous material.	Yes
MA 7 to MA 8 (includes National Trust Land)	AP 38	Figures 28.2a, 28.4a and 28.6a (map 11)	Possible double ditched enclosure of unknown date and may be related to the other ditch features in the area. The former field boundaries are most likely part of a former post-medieval field system. It is possible that these field boundaries relate to Abel Heath Farm, which is recorded on the 1 st Edition OS mapping for this area.	Low - Medium	Yes	Survey not possible due to sugar beet, and no longer forms part of the revised route.	No

Route Section	AP ID	Other IDs (RHDHV, NHER PrefRef, Headland Field number / AAAs) & Figure Number	Overview	Anticipated heritage significance (importance)	Targeted for priority geophysical survey	High-level geophysical survey results	Located within onshore project area?
	N/A	RHDHV 1490 / NHER 13581 Figure 28.2a (map 11)	Route of Midland and Great Northern Joint Railway (Great Yarmouth to Sutton Bridge). Now dismantled.	Low	No	N/A	Yes
	AP 39 NT Land west of Silvergate	RHDHV 1588 / NHER 12974 F67 and F68 Figures 28.2a, 28.4a and 28.6a (map 10)	Extensive field system with a rectangular enclosure with trackways. Ditches may run further than mapped extent.	Medium - High	Yes	Geophysical survey data shows a partial corroboration of the cropmark data, with features identified as being of possible archaeological or agricultural in origin. Additional linear features have been identified as possible archaeology. F69 which includes some of AP 39 was not possible to survey due to being overgrown, and a strip of F67 was under bird cover, and also not surveyed.	Yes, although the 45m route has been routed to avoid the densest concentration of cropmark features, where possible.
	AP 40 NT Land east of Silvergate	RHDHV 1589 / NHER 12975 F70 to F74 Figures 28.2a, 28.4a and 28.6a (map 10)	Former field boundaries possibly relating to post-medieval agriculture. There are also a large number of ditched features which are most likely earlier in date. It is noteworthy that the site of two ring ditches are recorded to the north	Medium - High	Yes	Geophysical survey data partially corroborates the cropmark data in this location.	Yes, although the 45m route has been routed to avoid the densest concentration

Route Section	AP ID	Other IDs (RHDHV, NHER PrefRef, Headland Field number / AAAs) & Figure Number	Overview	Anticipated heritage significance (importance)	Targeted for priority geophysical survey	High-level geophysical survey results	Located within onshore project area?
			(RHDHV 691) and south (AP 41 / RHDHV 692) of the proposed route in the area of AP 40.				of cropmark features.
	AP 41	RHDHV 692 / NHER 12785 F70 Figures 28.2a, 28.4a and 28.6a (map 10)	Site of a ring ditch described in the NHER. On review of the photos for this site it is more likely to be a natural feature rather than archaeological.	Medium	Yes (in part)	Geophysical survey data was only acquired for the northern-most extent of this AP site. No discernible archaeological features visible in the data.	No
	N/A NT Land west of The Bure	F75 and F76 Figure 28.6a (map 9)	Former field boundaries and linear features of agricultural origin.	Low (for traditional shallow sub-surface)	Yes (proposed crossing area - The River Bure)	Geophysical survey data shows former field boundaries and other agricultural anomalies, geological features and ferrous material.	Yes
	AP 42 East of The Bure	RHDHV 1038 / NHER 7403 Figures 28.2a, 28.4a and 28.6a (map 9)	Site of possible former moated manor with associated enclosures and drainage ditches. The ditch features may extend beyond their mapped extent but cannot be seen in the air photos.	Medium - High	No (beyond project boundary)	N/A	No
	AP 43	RHDHV 1616 / NHER 36453 F79 and F80	Large field boundaries and associated ditches.	Low	Yes	Not corroborated by geophysical survey data.	Yes

Route Section	AP ID	Other IDs (RHDHV, NHER PrefRef, Headland Field number / AAAs) & Figure Number	Overview	Anticipated heritage significance (importance)	Targeted for priority geophysical survey	High-level geophysical survey results	Located within onshore project area?
		Figures 28.2a, 28.4a and 28.6a (map 9)					
	AP 44	RHDHV 531 / NHER 60062 F82 Figures 28.2a, 28.4a and 28.6a (map 9)	Undated square enclosure. This feature is cut by a modern road.	Medium - High	Yes	Not corroborated by geophysical survey data.	Yes. But previously heavily truncated.
	AP 46	RHDHV 531 and 1614 / NHER 60062 and 3370 (RHDHV 679 / NHER 12772) F80 to F83 Figures 28.2a, 28.4a and 28.6a (map 9)	Multi period cropmark site consisting of ditches, field boundaries and field systems. The enclosure and henge monument within this area have been given their own monument polygon.	Medium - High	Yes	Geophysical survey data acquired exhibit and corroborate a few linear features of possible archaeological interest, which align with the cropmark data captured for AP 46. Although the density and complexity of AP46 is not reflected in the geophysical survey data. This may be because of an insufficient magnetic contrast in the soils in this area for some archaeological features, if present, to manifest as magnetic anomalies.	Yes

Route Section	AP ID	Other IDs (RHDHV, NHER PrefRef, Headland Field number / AAAs) & Figure Number	Overview	Anticipated heritage significance (importance)	Targeted for priority geophysical survey	High-level geophysical survey results	Located within onshore project area?
MA 8 to MA 9	AP 45	RHDHV 531 / NHER 3370 F82 AAA6 Figures 28.2a, 28.4a and 28.6a (map 9)	Causewayed ring ditch. Possibly a henge or hengiform monument.	High	Yes	The ring ditch (henge monument) is visible and very evident in the geophysical survey data. Discrete anomalies within the interior of the ring-ditch may locate pits.	No, the ring ditch (henge monument) feature has been avoided by means of micro-siting the route and associated mobilisation zone.
	AP 48	RHDHV 1615 / NHER 36454 F85 and F86 Figures 28.2a, 28.4a and 28.6a (map 8)	A series of former field boundaries and trackways. These features are likely to be more widespread than their visible extent.	Low	Yes	Geophysical survey data in this area partially corroborated the cropmark data, with additional former field boundaries visible aligning with those featuring on 1 st Edition OS mapping.	Yes
	AP 49	RHDHV 1615 / NHER 36454 Figures 28.2a, 28.4a and 28.6a (map 8)	Rectilinear enclosure with associated ditches. The possible internal pits may be associated with a former structure.	Medium - High	No (beyond project boundary)	N/A	No
	AP 50	F87, F88, F91 AAA7 and AAA8	Multi period ditched features which may form part of a wider field system and track ways. There are	Medium - High	Yes	The geophysical survey data has corroborated and enhanced the cropmark	Yes

Route Section	AP ID	Other IDs (RHDHV, NHER PrefRef, Headland Field number / AAAs) & Figure Number	Overview	Anticipated heritage significance (importance)	Targeted for priority geophysical survey	High-level geophysical survey results	Located within onshore project area?
	(West of Kings Beck)	Figures 28.2a, 28.4a and 28.6a (map 8)	also two possible enclosures. One of the enclosures may have associated ditches.			data in this area, showing a previously unrecorded irregularly-shaped enclosure, several linear anomalies of possible archaeological interest (AAA7), a north / south trackway and at least one rectangular enclosure appended to the western side of the trackway (AAA8).	
	AP 52 (West of Kings Beck)	Figure 28.4a (map 8)	Area of disturbed ground with possible archaeological features.	Low	No	N/A	No
	AP 51 (East of Kings Beck)	RHDHV 1607 / NHER 36499 F93 AAA9 Figures 28.2a, 28.4a and 28.6a (map 8)	Area of large ditches which may be part of a field system. There is also a possible large enclosure in the south-east of the area and also a large possible ring ditch in the centre. It is likely that these ditches are more than their visible extent.	High	Yes	Geophysical data acquired in the location of AP 51 indicates the presence of a more complex and concentrated area of features of archaeological interest than indicated by the cropmark data alone, with an extensive complex of criss-crossing linear and	Yes

Route Section	AP ID	Other IDs (RHDHV, NHER PrefRef, Headland Field number / AAAs) & Figure Number	Overview	Anticipated heritage significance (importance)	Targeted for priority geophysical survey	High-level geophysical survey results	Located within onshore project area?
						<p>rectilinear anomalies forming multiple interlinking enclosures. The possible ring-ditch is captured in both cropmark and geophysical survey data.</p> <p>Priority area for post-consent archaeological trial trenching.</p>	
	N/A	F94 Figure 28.6a (map 8)	Former field boundaries.	Low	Yes (area between two AP sites)	Geophysical survey data shows former field boundaries, features of agricultural origin and geological features.	Yes
	AP 53	RHDHV 1612 / NHER 35549 F95 and F96 Figures 28.2a, 28.4a and 28.6a (map 7)	Two possible square enclosures with associated ditches.	Medium	Yes	The geophysical data partially corroborates and partially builds upon the cropmark data at this location. The survey data also indicates the presence of additional features identified as possible archaeology.	Yes
	AP 54	F98	Area of various ditches, field boundaries and trackways most likely of multiple dates.	Low - Medium	Yes	The geophysical survey area encompasses two cropmark features which are	Yes, although the cable has been routed

Route Section	AP ID	Other IDs (RHDHV, NHER PrefRef, Headland Field number / AAAs) & Figure Number	Overview	Anticipated heritage significance (importance)	Targeted for priority geophysical survey	High-level geophysical survey results	Located within onshore project area?
		Figures 28.2a, 28.4a and 28.6a (map 7)				corroborated and built upon in the geophysical survey data. Although only likely to be former field boundaries or anomalies of more recent agricultural origin.	to avoid the cropmark features in this area.
	AP 56	F99 and F100 Figures 28.2a, 28.4a and 28.6a (map 7)	Former field boundaries and trackways which may relate to post-medieval farming. It is possible the trackways and ditches are earlier in date.	Low	Yes	The geophysical survey data does not corroborate the cropmark data but does indicate the presence of additional linear features (former field boundaries).	Yes
	AP 55	RHDHV 435 and 762 / NHER 12821 and 37987 F101 Figures 28.2a, 28.4a and 28.6a (map 7)	Possible field systems with enclosures and trackways. These features may relate to the field system remains to the east and south. The NHER states the north of the site was excavated in 2003 revealing a Bronze Age cremation cemetery and Iron Age pits. Located to the north of the cable route.	Medium - High	Yes	No access possible.	Yes
MA 9 to MA 10	AP 57 (East of the A149)	RHDHV 435 and NHER 12821 F103	A range of multi period features including possible ring ditches, trackways field systems and possible enclosures. These features most likely relate to the possible field systems to the west.	Medium - High	Yes	No access possible. Priority area for post-consent archaeological geophysical survey and trial trenching.	Yes. Although the route has avoided areas of the main

	AP 129	RHDHV 708 / NHER 38731 (RHDHV 736 / NHER 55788) F156 Figures 28.2a, 28.4a and 28.6a (map 2)	Cropmarks of probable Bronze Age ring ditch.	High	Yes	No access.	No. The cable has been routed to the north to avoid this feature.
	AP 126	RHDHV 710 / NHER 38736	Cropmarks of probable Bronze Age round barrow.	High	Yes	This feature is visible in the geophysical survey data.	No. The cable has been routed

Route Section	AP ID	Other IDs (RHDHV, NHER PrefRef, Headland Field number / AAAs) & Figure Number	Overview	Anticipated heritage significance (importance)	Targeted for priority geophysical survey	High-level geophysical survey results	Located within onshore project area?
		(RHDHV 736 / NHER 55788) F158 Figures 28.2a, 28.4a and 28.6a (map 2)					to the north to avoid this feature.
	AP 127	RHDHV 709 / NHER 38735 (RHDHV 736 / NHER 55788) F157 Figures 28.2a, 28.4a and 28.6a (map 2)	Cropmark of probable Bronze Age ring ditch.	High	Yes	Geophysical survey data partially corroborates the cropmark data at this location.	No. The cable has been routed to the north to avoid this feature.
	AP 128	RHDHV 1133 / NHER 38738 F157 and F158 Figures 28.2a, 28.4a and 28.6a (map 2)	Undated trackway.	Low	Yes	Geophysical survey data partially corroborates the cropmark data at this location.	Yes (slight interaction only).
	AP 131	RHDHV 818 / NHER 38739 F157 and F158	Cropmarks of possible Iron Age to Roman and post-medieval field boundaries.	Medium - High	Yes	Geophysical survey data partially corroborates the	No. The cable has been routed

Route Section	AP ID	Other IDs (RHDHV, NHER PrefRef, Headland Field number / AAAs) & Figure Number	Overview	Anticipated heritage significance (importance)	Targeted for priority geophysical survey	High-level geophysical survey results	Located within onshore project area?
		Figures 28.2a, 28.4a and 28.6a (map 2)				cropmark data at this location.	to the north to avoid this feature.
	AP 125	RHDHV 1134 / NHER 38740 F158 Figures 28.2a, 28.4a and 28.6a (map 2)	Cropmarks of possible medieval to post-medieval field boundaries.	Low	Yes	Only the northernmost extent of this feature has been subject to survey. Geophysical survey data indicates a partial corroboration of the cropmark data in this area, with some features shown to be of greater extent than indicated by the cropmark data.	No
	AP 118	RHDHV 712 / NHER 38768 F159 (RHDHV 736 / NHER 55788) Figures 28.2a, 28.4a and 28.6a (map 2)	Cropmarks of possible Bronze Age ring ditch.	High	Yes	Not corroborated by geophysical survey data.	No. The cable has been routed to the north to avoid this feature.
	AP 119	RHDHV 908 / NHER 36765	Cropmarks of undated field systems.	Low - Medium	Yes	The geophysical survey data corroborates the cropmark	No

Route Section	AP ID	Other IDs (RHDHV, NHER PrefRef, Headland Field number / AAAs) & Figure Number	Overview	Anticipated heritage significance (importance)	Targeted for priority geophysical survey	High-level geophysical survey results	Located within onshore project area?
		F160 AAA19 Figures 28.2a, 28.4a and 28.6a (map 1)				data at this location. The survey data also shows a large number of additional archaeological features in and to the east of F160, indicative of roadside settlement activity, with a number of conjoined enclosures visible, signifying a more dense concentration of sub-surface remains than that indicated by the cropmark data alone. Anomalies within the interior of the enclosures indicate settlement activity.	
	AP 120	RHDHV 915 / NHER 38769 F159 and F160 AAA19 Figures 28.2a, 28.4a and 28.6a (maps 1 and 2)	Ditches boundaries and coaxial field system, unknown or possibly Roman date.	Medium - High	Yes	The geophysical survey data corroborates the cropmark data at this location. The survey data also shows a large number of additional archaeological features in and to the east of F160, indicative of roadside settlement activity, with a number of conjoined enclosures visible, signifying a more dense concentration	Yes

Route Section	AP ID	Other IDs (RHDHV, NHER PrefRef, Headland Field number / AAAs) & Figure Number	Overview	Anticipated heritage significance (importance)	Targeted for priority geophysical survey	High-level geophysical survey results	Located within onshore project area?
						of sub-surface remains than that indicated by the cropmark data alone. Anomalies within the interior of the enclosures indicate settlement activity.	
	N/A	F161 and F162 (west) Figure 28.6a (map 1)	Archaeological features are visible in the geophysical survey data, including linear features. Possibly relates to features observed in F160.	Medium	Yes	Geophysical survey data fills a potential gap in the data between AP 119 and 120 to the west and AP 80 and 91 to the east. Anomalies are less-well defined with no clear enclosures discernible although they are characteristic of settlement activity, with indications of localised quarrying and / or industry on the margins of the settlement. Priority area for post-consent archaeological trial trenching.	Yes
	AP 78	RHDHV 1135 and 1144 / NHER 38743 and 38777	Medieval or post-medieval cropmarked track way.	Low	Yes	Geophysical survey data partially corroborates the cropmark data at this location.	No

Route Section	AP ID	Other IDs (RHDHV, NHER PrefRef, Headland Field number / AAAs) & Figure Number	Overview	Anticipated heritage significance (importance)	Targeted for priority geophysical survey	High-level geophysical survey results	Located within onshore project area?
		F162 Figures 28.2a, 28.4a and 28.6a (map 1)					
	AP 79	RHDHV 715 / NHER 38775 F162 (RHDHV 736 / NHER 55788) Figures 28.2a, 28.4a and 28.6a (map 1)	Likely Bronze Age round barrow.	High	Yes	Geophysical survey data corroborates the cropmark data at this location to a small degree, although this feature is less distinct in the geophysical survey data.	No. The cable has been routed to avoid this feature.
	AP 80	RHDHV 814 / NHER 36495 F162 and F164 to F166 AAA19 and AAA20 Figures 28.2a, 28.4a and 28.6a (map 1)	Extensive area of multi period cropmarked ditches - likely field systems tracks and boundaries.	Medium	Yes	Geophysical survey data partially corroborates the cropmark data at this location. This feature extends into the Landfall.	Yes
	AP 81	RHDHV 714 / NHER 38774 (RHDHV 736 / NHER 55788)	Likely bronze Age round barrow.	High	Yes	This feature is visible in the geophysical survey data. Discrete anomalies within	No. The cable has been routed

Route Section	AP ID	Other IDs (RHDHV, NHER PrefRef, Headland Field number / AAAs) & Figure Number	Overview	Anticipated heritage significance (importance)	Targeted for priority geophysical survey	High-level geophysical survey results	Located within onshore project area?
		F164 AAA20 Figures 28.2a, 28.4a and 28.6a (map 1)				the interior of the ring-ditch may be due to pits.	to avoid this feature.
	AP 123	RHDHV 786 / NHER 38744 (RHDHV 460 / NHER 17351) Figures 28.2a, 28.4a and 28.6a (map 1)	Cropmarks showing farmstead, field system, trackway and boundaries of possible Iron Age / Roman date.	Medium - High	No (beyond project boundary)	N/A	No
	AP 91	RHDHV 828 / NHER 16015 F165 and F166 AAA19 and AAA20 Figures 28.2a, 28.4a and 28.6a (map 1)	Extensive cropmarked multi period landscape, field trackways, possible grubenhauser (sunken houses) and ditches.	Medium - High	Yes	The geophysical survey data partially corroborates the cropmark data at this location. The survey data also shows faint and fragmentary linear anomalies which correspond to a series of cropmark data although no clear pattern is discernible in the data.	Yes. Although the landfall and indicative compound footprints have been carefully sited to avoid the densest concentration of potential
