## 1 Introduction

1. Table 1.1 details the short list of plans and projects which were included in the CIA and transboundary assessments for each offshore chapter.
2. The long list of projects that were considered during the initial screening process in 2016/17 is provided in Annex 32.2.1.

Table 1.1 Plans and Projects included in the CIA

Project	Status	Indicative development period	Distance from Norfolk Boreas (km)	Project definition	Project data status	Included in CIA	Rationale
<b>Chapter 8 Marine Geology, Oceanography and Physical Processes</b>							
East Anglia THREE Offshore Wind farm	Consented	2022-2026	0	PDS available	Complete/high	Yes	This project would be located approximately 13km to the south of Norfolk Boreas. It has potential for interaction during the construction of foundations and their operation and maintenance
Norfolk Vanguard Offshore Wind farm	Application submitted	2024-2028	1	Outline only	Incomplete/low	Yes	This project would be adjacent to Norfolk Boreas and would share the offshore cable corridor. It has potential for interaction during the construction and operation and maintenance phases
Marine aggregate dredging	Licensed	In operation	Nearest 27km		Complete/high	Yes	The export cables for Norfolk Boreas pass north of marine aggregate extraction areas offshore from Great Yarmouth. There is potential for some interaction between their dredging plumes and plumes from cable installation
Bacton and Walcott Coastal Management Scheme	Application submitted August 2018	Expected construction date 2019	Nearest approximately 60km	Project description available	Complete/high	No	It is anticipated that the works will be undertaken in the period between April and November 2019 and as construction for

							Norfolk Boreas landfall would start in 2022 at the earliest no overlap in construction periods is anticipated. Modelling for the project indicates that once the sediment has been deposited it would not be particularly mobile and therefore would not act cumulatively with Norfolk Boreas construction to impact on water quality.
Coastal defence/protection works, Happisburgh PF/18/0751	Registered Application 24/04/2018	Coastal protection over 10 year duration	Approximately 1km	Outline	Medium	No	The Norfolk Boreas Long HDD would have no impact on coastal erosion, and the nearshore cable protection would have negligible impact on sediment transport processes at the coast

East Anglia THREE Offshore Wind farm	Consented	2022-2026	13	PDS available	Complete/high	Yes	This project would be located approximately 13km to the south of Norfolk Boreas. It has potential for interaction during the construction of foundations and cable array installation.
Marine aggregate dredging	Licensed	In operation	Nearest 27km		Complete/high	Yes	The export cables for Norfolk Boreas pass north of marine aggregate extraction areas offshore from Great Yarmouth. There is potential for some interaction between their dredging plumes and plumes from cable installation
Bacton and Walcott Coastal Management Scheme	Application submitted	Construction due 2019	Approximately 1	ES available	Complete/high	No	The Norfolk Boreas Long HDD would have no impact on coastal erosion, and the nearshore cable protection would have negligible impact on sediment transport processes at the coast
Coastal defence/protection works, Happisburgh PF/18/0751	Registered Application 24/04/2018	10 year duration	Approximately 1	Outline	Medium	No	Due to the use of a Long HDD there would be no overlap in activities associated with the two schemes

<b>Chapter 12 Marine Mammals</b>							
Appendix 12.3 details the plans and projects which were considered for the Marine Mammal CIA.							
<b>Chapter 13 Offshore Ornithology</b>							
Greater Gabbard	Built and operational	Fully commissioned Aug 2013	111	Parameter not used in assessment	Complete for the ornithology receptors being assessed	Yes	Included as an operational project that does not yet form part of the baseline.
Gunfleet Sands	Built and operational	Fully commissioned Jun 2010	160	Parameter not used in assessment	Complete for the ornithology receptors being assessed	Yes	Included as an operational project that does not yet form part of the baseline.
Kentish Flats	Built and operational	Fully commissioned Dec 2005	191	Parameter not used in assessment	Complete but limited quantitative species assessment	Yes	Operational for a sufficiently long time that its effects will have been incorporated in surveys but not yet in population responses
Lincs	Built and operational	Fully commissioned Sep 2013	150	Parameter not used in assessment	Complete but limited quantitative species assessment	Yes	Included as an operational project that does not yet form part of the baseline.

Project	Status	Indicative development period	Distance from Norfolk Boreas (km)	Project definition	Project data status	Included in CIA	Rationale
London Array (Phase 1)	Built and operational	Fully commissioned Apr 2013	128	Parameter not used in assessment	Complete but limited quantitative species assessment	Yes	Included as an operational project that does not yet form part of the baseline.
Lynn and Inner Dowsing	Built and operational	Fully commissioned Mar 2009	151	Parameter not used in assessment	Complete but limited quantitative species assessment	Yes	Included as an operational project that does not yet form part of the baseline.
Scroby Sands	Built and operational	Fully commissioned Dec 2004	68	Parameter not used in assessment	Complete but limited quantitative species assessment	Yes	Operational for a sufficiently long time that its effects will have been incorporated in surveys but not yet in population responses
Sheringham Shoal	Built and operational	Fully commissioned Sep 2012	104	Parameter not used in assessment	Complete but limited quantitative species assessment	Yes	Included as an operational project that does not yet form part of the baseline.
Beatrice (demonstrator)	Built and operational	Fully commissioned Sep 2007	677	Parameter not used in assessment	Complete but limited quantitative species assessment	Yes	Included as an operational project that does not yet form part of the baseline.
Thanet	Built and operational	Fully commissioned Sep 2010	175	Parameter not used in assessment	Complete for the ornithology	Yes	Included as an operational project that does not yet form part of the baseline.
