Norfolk Boreas

I write following a discussion I have had with my constituent, Beverley Wigg, who has been responsible for communication for the organisation 'No 2 Relay Stations' (N2RS).

I was delighted by the decision of Vattenfall to opt for a HVDC power supply through the cable and I know that N2RS share this view and make this clear in their submission.

The key point that I wanted to reinforce was that there is strong support for HVDC locally but any variation from this would be strongly opposed. My understanding is that Vattenfall are now only proceeding with HVDC and that it would not be possible for them to substitute an AC alternative at this late stage. I would like to stress the importance of HVDC for Boreas.

Unfortunately I have been unable to meet the submissions deadline but I would be grateful if my comments could be noted.

With best wishes

Yours sincerely,

The Rt Hon Sir Norman Lamb MP
Member of Parliament for North Norfolk
