---

Dear Sir/Madam,

Please see the attached Statement of Common Ground, the Local Impact Report and a Summary of the Local Impact Report for the Norfolk Boreas Wind Farm project. The Local Impact Report addresses the majority of the written questions put forward by the Examining Authority for Breckland Council, though I also attach a specific response from the Environmental Health team to matters relevant to those officers.

These submissions are made to meet Deadline 2 of the process.

Kind Regards,  
Jon

**Jon Berry**

Head of Development Management  
Breckland Council

Hi Jon

I have had a look at the questions posed and been back through the PEIR and answered anything that I think is pertinent to BDC

## 12.2 – Noise and vibration

### 12.2.1 – Location of noise sensitive receptors

1. the majority of NSRs on Map 1 of 9 are located south of the cable route, although there are some potential receptors (e.g. Chimney Farm) to the north;

Part of map 6 and maps 7, 8 and 9 show Breckland district. For the cable route receptors CCR, there are 14, of which 6 are on the southern or south east side of the cable route. Having looked again I feel they are representative of the residential areas.

### 12.2.6 – Monitoring of noise levels

1. Explain what action could be taken should monitoring identify that the noise rating levels specified in Requirement 27 are exceeded? Possibly a question for the applicant, however the mitigation methods modelled are standard enclosures for a worst case scenario. It would be possible to provide bespoke enclosure with more mass to further attenuate sound

2. Is Breckland Council content that the drafting of dDCO [AS-019] Requirement 27 is sufficient to ensure corrective action be taken should the specified rating levels be exceeded?

Yes

3. Explain why details relating to the complaints procedure for noise and vibration, as referred to in ES Chapter 25 [APP-238, Table 25.3], are not reflected in the outline CoCP [APP-692]?

Again probably a question for the applicant, but I feel that it might be prudent to ensure construction noise is directly mentioned in the noise and vibration. Also light pollution, in particular outside working hours.

Kind regards

Sue
