Ms Evans/ case team,

Please accept this email as notification that we wish to attend the Cawston section of the accompanied site visit [on 23rd January 2020](#).

As a property which has been identified as at risk from the traffic plans (Council submissions Vanguard deadline 8) we would request the inspectorate come into our home to see the proximity of the road to the house, specifically the position of our large cellar void in relation to the road. We also offer you the opportunity to visit our upper storey. Noise/ vibration monitors were placed at ground level outside our home but the corridor effect upwards at this pinch point is significant.

Could you please inform us of the timetable for the site visit so we can book appropriate time off work to be involved. Thank you.

kind regards  
Polly Brockis
