Dear Planning Inspectorate

We would like the applicant to be asked the following question.

There has been a lot of contention about jobs it is claimed will be created for the village locality by Boreas and the Vanguard project. The closest answer we've had in regard to actual job possibilities for Necton was when Catrin Jones told a journalist from the EDP in a video that locals from Necton could drive tractors for them in the landscaping. This condescending remark has an even darker side than the obvious derogatoriness. Farm hands, including those who drive tractors may well lose their jobs due to the 2 farms in the area being ruined by Vattenfall.

So our question is, how many jobs does the applicant think they will actually offer Necton and how does that compare with job losses on two farms?

Thank you

NSAG
