ExA's Further Written Questions Norfolk Boreas - Issued 12th February 2020

Response on behalf of National Grid to question 2.0.6

Question No.	Question	Response
2.3.027	"What progress has been made in reaching agreement with National Grid, Cadent Gas and Network Rail? If agreement has been reached, confirm the timescale for withdrawal of objections to the Norfolk Boreas application [REP1-041]."	National Grid have now largely agreed protective provisions with the Promoter, which we understand now just await final promoter approval before insertion into the dDCO. In relation to issues as with National Grid Gas Plc the parties have reached a good level of agreement in relation to documentation which will enable the withdrawal of their objection. In relation to National Grid Electricity Plc the parties have further drafting remaining to be agreed in order to finalise the documentation addressing the interaction with their assets and to secure the withdrawal of their objection. However National Grid anticipate being able to deal with these points by way of agreement with the promoter in the near future and would anticipating having agreement by deadline 7 and completed documentation such that National Grid is able to withdraw their objections by deadline 8.
